Green Political Theory Robert E. Goodin,2013-04-30 With their remarkable electoral successes Green parties worldwide seized the political imagination of friends and foes alike Mainstream politicians busily disparage them and imitate them in turn This new book shows that greens deserve to be taken more seriously than that This is the first full length philosophical discussion of the green political programme Goodin shows that green public policy proposals are unified by a single coherent moral vision a green theory of value that is largely independent of the green theory of agency dictating green political mechanisms strategies and tactics on the one hand and personal lifestyle recommendations on the other The upshot is that we demand that politicians implement green public policies and implement them completely without committing ourselves to the other often more eccentric aspects of green doctrine that threaten to alienate so many potential supporters

Hopeful Pessimism Mara van der Lugt,2025-01-21 Why hopeful pessimism is not a contradiction in terms but a powerful source of moral and political commitment The climate debate is rife with calls for optimism While temperatures rise and disasters intensify we are asked to maintain optimism and hope as if the real threat is pessimism and despair In this erudite and engaging book Mara van der Lugt argues that this is a mistake crude optimism can no longer be a virtue in a breaking world and may well prove to be our besetting vice In an age of climate change and ecological devastation the virtue we need is hopeful pessimism Drawing on thinkers that range from J R R Tolkien and Mary Shelley to Albert Camus and Jonathan Lear van der Lugt invites us to rethink what we thought we knew about optimism and pessimism hope and despair activism and grief She shows that pessimism is closely linked to a tradition of moral and political activism and offers a different way to think about pessimism not as synonymous with despair but as compatible with hope Gently yet fiercely van der Lugt argues that what we need to avoid is not pessimism but fatalism or self serving resignation Pessimism does not imply the loss of courage or the lack of a desire to strive for a better world on the contrary these are the very gifts that pessimism can bestow What *Hopeful Pessimism* asks instead is that we strive for change without certainties without expecting anything from our efforts other than the knowledge that we have done what we are called upon to do as moral agents in a time of change
