

All about VIRTUAL REALITY

Virtual reality is a technology that creates an artificial environment for the user through mobile phones, headsets, and other gadgets.

Advantages

1. Creates more opportunities for people that don't have the possibility to travel around the world.
2. Makes education more interactive and immersive which eventually helps retain students' attention.
3. Lowers the cost of the entire treatment process patients undergo.

Disadvantages

1. Even though engineers are working on improving this relatively new technology, it still has a lot of functionality issues.
2. The immersive effect and superficially created environment may create an extreme VR-addiction in people.
3. Even though VR has fallen dramatically in prices over the years, it remains one of the most expensive advanced technologies.
