Wild Taste:

Wild Taste of Nature Irv Rueger, Bud Richardt, 2018-04-23 Irv has been interested in wild edibles since he was in college in the 60s. When he was president of the Audubon Society in Evansville, Indiana, he and Doris Eicher would put on wild edible feasts sponsored by the Audubon Society. In the mid 90s, he wrote a wild edible column for *Hoosier Sportsman*. Bud had a keen interest in nature all his life and was a self-taught beekeeper and computer manipulator. Part of foraging for wild edibles is being outdoors and enjoying nature rather than being in a crowded supermarket and being alone even though there are hundreds of people around you.

Rewilding Food and the Self Tristan Fournier, Sébastien Dalgalarro, 2022-11-04 This volume contributes to the return to nature movement that is very much in vogue in contemporary European societies by examining the place of food and eating in the rewilding process. It is divided into three parts, each of which consists of conversations between social scientists with fieldwork collected from across Denmark, Finland, France, Italy, Norway, and Switzerland. The first part focuses on the ways in which the hunter-gatherer livelihood has been transformed into a resilient, simpler, and ecological way of life. It is dedicated to hunting and identifies the contexts in which large wild game meat is consumed and the reasons why such a product is still valued today. The second part shows how some practices that aim to reconnect with natural processes are developing within a market economy. Case studies on natural wine and fasting retreats help us to identify the promises that producers and promoters are relying on in order to disseminate them. Finally, the third part considers how this process of rewilding food is expressed in post-modernity. By focusing on two normative frameworks in which the rhetoric of the wild is mobilized, although it is not expected to be in these terms: urbanity and the gender order, the goal is to understand the extent to which referring to the wild in food discourses and practices contributes to challenging our identities and to creating possible forms of emancipation. This book will be of great interest to students and scholars interested in food cultures, human-nature relationships, and sustainable diets.

Wildness Lydia Willsky-Ciullo, 2026-03-01 In and through his experience of nature, Henry David Thoreau imagined and developed a distinctly American theology of the wild. In *Wildness: Henry David Thoreau and the Making of an American Theology*, Lydia Willsky-Ciullo articulates how Thoreau was enmeshed in a decades-spanning project of crafting a theology of wildness. During Thoreau's post-college years and his time at Walden Pond, he evolved from hopeful writer to observant theologian whose primary work as a surveyor enabled his theological vocation. Willsky-Ciullo skillfully guides readers through Thoreau's writings and life as his theology emerges and evolves. The focus of Thoreau's theology, wildness itself, centers on the divinity extant in every person and in every molecule of creation. Definitely American in its ethos, Thoreau's theology reflects a distinctly American set of tensions: progress and tradition, wilderness and civilization, the destructive and the generative nature of work, the individual and the society, the local and the universal, and the Christian and the pluralist. While remaining critical of dogmatism and institutional rigidity, he formed his theological vision in conversation with the Christianity of his

own time and place Ultimately theology is an active process and interpreting the wild experience of divine revelation is the purview of all Thoreau left the door open to his readers who he hoped would pick up the pen where he left off and write their own theologies of wildness
