**Solving Systems of Linear Inequalities** Shyh-Huei Chen,2001 *Soviet Journal of Computer and Systems Sciences*,1988 *Convexity and Optimization in Finite Dimensions I* Josef Stoer,Christoph Witzgall,2012-12-06 Dantzig's development of linear programming into one of the most applicable optimization techniques has spread interest in the algebra of linear inequalities the geometry of polyhedra the topology of convex sets and the analysis of convex functions It is the goal of this volume to provide a synopsis of these topics and thereby the theoretical back ground for the arithmetic of convex optimization to be treated in a sub sequent volume The exposition of each chapter is essentially independent and attempts to reflect a specific style of mathematical reasoning The emphasis lies on linear and convex duality theory as initiated by Gale Kuhn and Tucker Fenchel and v Neumann because it represents the theoretical development whose impact on modern optimi zation techniques has been the most pronounced Chapters 5 and 6 are devoted to two characteristic aspects of duality theory conjugate functions or polarity on the one hand and saddle points on the other The Farkas lemma on linear inequalities and its generalizations Motzkin's description of polyhedra Minkowski's supporting plane theorem are indispensable elementary tools which are contained in chapters 1 2 and 3 respectively The treatment of extremal properties of polyhedra as well as of general convex sets is based on the far reaching work of Klee Chapter 2 terminates with a description of Gale diagrams a recently developed successful technique for exploring polyhedral structures Systems of Linear Inequalities A. S. Solodovnikov,1980-02 This volume describes the relationship between systems of linear inequalities and the geometry of convex polygons examines solution sets for systems of linear inequalities in two and three unknowns extension of the processes introduced to systems in any number of unknowns is quite simple and examines questions of the consistency or inconsistency of such systems Finally it discusses the field of linear programming one of the principal applications of the theory of systems of linear inequalities A proof of the duality theorem of linear programming is presented in the last section *Advances in Optimization and Approximation* Ding-Zhu Du,Jie Sun,2013-12-01 This book is a collection of research papers in optimization and approximation dedicated to Professor Minyi Yue of the Institute of Applied Mathematics Beijing China The papers provide a broad spectrum of research on optimization problems including scheduling location assignment linear and nonlinear programming problems as well as problems in molecular biology The emphasis of the book is on algorithmic aspects of research work in optimization Special attention is paid to approximation algorithms including heuristics for combinatorial approximation problems approximation algorithms for global optimization problems and applications of approximations in real problems The work provides the state of the art for researchers in mathematical programming operations research theoretical computer science and applied mathematics **Systems of Linear Inequalities** Aleksandr Samuilovich Solodovnikov,1979 **Bulletin of the American Mathematical Society** American Mathematical Society,1930 Annals of Mathematics ,1927 Founded in 1884 Annals of Mathematics publishes research
