

Teaching As Learning

James M. Lang

Teaching As Learning:

On Teaching and Learning Jane Vella, 2014-07-17 On Teaching and Learning takes the ideas explored in renowned educator Jane Vella's best-selling book *Learning to Listen Learning to Teach* to the next level and explores how dialogue education has been applied in educational settings around the world. Throughout the book she shows how to put the principles and practices of dialogue education into action and uses illustrative stories and examples from her extensive travels. Dialogue education values inquiry, integrity, and commitment to equity values that are also central to democracy. Learners are treated as beings worthy of respect, recognized for the knowledge and experience they bring to the learning experience. Dialogue education emphasizes the importance of safety and belonging. It is an approach that welcomes one's certainties and one's questions.

Contextual Teaching and Learning Elaine B. Johnson, 2002 Dr. Johnson's book is far more than a how-to guide for constructing meaningful learning activities for students. It is the definitive treatise on the fundamental concepts of acquiring and transferring knowledge. This is an invaluable contribution. Arlene H. Parisot, Director of Workforce Department, Office of Commissioner of Higher Education, Montana State System. This is a must-read for all teachers and administrators in their search for meaning. Elaine Johnson has artfully captured the essence of the best practices conversation taking place in schools today by speaking directly to the heart of classroom experience. Stephen Olczak, Principal, Reynolds High School, Oregon. Contextual teaching and learning (CTL) is a system for teaching that is grounded in brain research. Brain research indicates that we learn best when we see meaning in new tasks and material and we discover meaning when we are able to connect new information with our existing knowledge and experiences. Students learn best according to neuroscience when they can connect the content of academic lessons with the context of their own daily lives. Johnson discusses the elements of the brain-compatible contextual teaching and learning system, making meaningful connections, investing school work with significance, self-regulated learning, collaboration, critical and creative thinking, nurturing the individual, reaching high standards, and using authentic assessment. Drawing on the practices of teachers in kindergarten through university, Johnson provides numerous examples of how to use each part of the CTL system. *Contextual Teaching and Learning: What It Is and Why It's Here to Stay* is more than a handbook on precise steps to follow to help children of all abilities achieve high standards by joining academic lessons with their immediate context. This book also explains how the brain works, discusses why teachers need to pay attention to context, and makes a strong case for the need to teach students to think critically and creatively. This inspirational book urges educators to eliminate the student question, "Why do we have to learn this?" If the educators invest learning with meaning by relying on context, that question won't have to be asked.

The Wisdom of Practice Lee S. Shulman, 2004-04 What do teachers need to know in order to teach well? How important is the depth and quality of teachers' content knowledge as a critical aspect of their ability to teach? How can teachers best be educated and how can we assess their accomplishments as teachers? In what ways is the professional preparation of teachers comparable to

the preparation of physicians and other members of learned professions What kinds of educational research can provide deeper understanding of teaching learning and the reform of education These are just some of the many questions answered in this landmark collection of Lee Shulman s best work A pioneer in the field of teaching and teacher research Shulman s work and thinking have long influenced teachers and researchers But while Shulman is one of the most widely cited scholars in education his writings have been scattered among a variety of books and journals until now *The Wisdom of Practice* at last makes Shulman s major works on K 12 education and teacher education available in one volume His interests in teaching of all sorts in K 12 schools in teacher education in graduate programs for educational researchers in liberal education have been diverse The essays included touch on such wide ranging topics as the psychology of school subjects medical problem solving teacher knowledge performance assessment teaching in higher education the scholarship of teaching and learning the characteristics and pedagogies of the professions the role of cases in professional education and research and the character of relevant and rigorous educational research

Teaching as Learning Jean McNiff,1993-01 In this fascinating and very personal book Jean McNiff author of the successful *Action Research Principles and Practice* argues that educational knowledge is created by individual teachers as they attempt to express their own values in their professional lives Working with case studies of actual practice she looks again at the familiar action research paradigm of identifying a problem imagining implementing and evaluating a solution and modifying practice in the light of that evaluation She gives practical advice on how working in this way can aid the professional development of action researcher and practitioner alike She concludes that the best teaching is done by those who want to learn and who can show others how to be open to their own processes of self development

Small Teaching James M. Lang,2021-07-26 A freshly updated edition featuring research based teaching techniques that faculty in any discipline can easily implement Research into how we learn can help facilitate better student learning if we know how to apply it *Small Teaching* fills the gap in higher education literature between the primary research in cognitive theory and the classroom environment In this book James Lang presents a strategy for improving student learning with a series of small but powerful changes that make a big difference many of which can be put into practice in a single class period These are simple interventions that can be integrated into pre existing techniques along with clear descriptions of how to do so Inside you ll find brief classroom or online learning activities one time interventions and small modifications in course design or student communication These small tweaks will bring your classroom into alignment with the latest evidence in cognitive research Each chapter introduces a basic concept in cognitive research that has implications for classroom teaching explains the rationale for offering it within a specific time period in a typical class and then provides concrete examples of how this intervention has been used or could be used by faculty in a variety of disciplines The second edition features revised and updated content including a newly authored preface new examples and techniques updated research and updated resources How can you make small tweaks to your teaching to bring the latest

cognitive science into the classroom How can you help students become good at retrieving knowledge from memory How does making predictions now help us learn in the future How can you build community in the classroom Higher education faculty and administrators as well as K 12 teachers and teacher trainers will love the easy to implement evidence based techniques in Small Teaching

Teaching for Deeper Learning Jay McTighe,Harvey F. Silver,2020-01-22 Far too often our students attain only a superficial level of knowledge that fails to prepare them for deeper challenges in school and beyond In Teaching for Deeper Learning renowned educators and best selling authors Jay McTighe and Harvey F Silver propose a solution teaching students to make meaning for themselves Contending that the ability to earn understanding will equip students to thrive in school at work and in life the authors highlight seven higher order thinking skills that facilitate students acquisition of information for greater retention retrieval and transfer These skills which cut across content areas and grade levels and are deeply embedded in current academic standards separate high achievers from their low performing peers Drawing on their deep well of research and experience the authors Explore what kind of content is worth having students make meaning about Provide practical tools and strategies to help teachers target each of the seven thinking skills in the classroom Explain how teachers can incorporate the thinking skills and tools into lesson and unit design Show how teachers can build students capacity to use the strategies independently If our goal is to prepare students to meet the rigorous demands of school college and career then we must foster their ability to respond to such challenges This comprehensive practical guide will enable teachers to engage students in the kind of learning that yields enduring understanding and valuable skills that they can use throughout their lives

Learning is a Verb Sherrie Reynolds,2005 This book explores a new way of thinking about teaching and learning Its central goal is to help us understand how we think and learn it will also help teachers understand children and offers a new and helpful perspective on the role of teaching The book provides an orientation or way of thinking about the psychological dimensions of teaching and learning This orientation is discussed in relation to cultural shifts that have influenced all fields of study in education and psychology the shift is reflected in the works of such scholars as Piaget Vygotsky Bruner and others Their work marks a change from a mechanical view of learning to a view of learning as dynamic transformation In Learning Is a Verb Sherrie Reynolds discusses how thinking about teaching and learning must change so that we can create conditions that help children think and interact with one another in helpful healthy ways Her engaging conversational style together with many examples and observations will lead readers from reflection on their experiences to a deeper understanding of the changes needed in our educational system

New Science of Teaching and Learning Dr. Amandeep Kaur,2023-06-06 The research data is based on findings from many fields like neuroscience genetics and psychology filtered through the lens of education for exploring new challenges in Education and finding ways to solve various educational problems may it be learning disabilities motivational problems memory development of thinking or similar sort of teaching learning problems The 7C s instructional model is designed

based on the principles and Instructional Guidelines of Mind Brain and Educational Science to focus on the development of thinking skills among learners The main objective of 7C s instructional model is to make the process of learning more meaningful and interesting to the learners by using positive emotions in teacher student interactions and creating a good learning environment *The Third Teacher* OWP/P Cannon Design, Inc.,VS Furniture,Bruce Mau Design,2014-07-11 Created by an international team of architects and designers concerned about our failing education system The Third Teacher explores the critical link between the school environment and how children learn and offers 79 practical design ideas both great and small to guide reader s efforts to improve our schools Written for anyone who has school age children in their life from educators and education decision makers to parents and community activists this book is intended to ignite a blaze of discussion and initiative about environment as an essential element of learning Including a wealth of interviews facts statistics and stories from experts in a wide range of fields this book is a how to guide to be used to connect with the many organizations individuals and ideas dedicated to innovating and improving teaching and learning Contributors include children s singer and advocate Raffi author and creativity consultant Sir Ken Robinson scientist and environmentalist David Suzuki inventor James Dyson and other experts who are working to create fresh solutions to problems and create a new blueprint for the future of education *Teaching and Learning in a Community of Thinking* Yoram Harpaz,2013-11-11 This book explores a new pedagogical model called The Third Model which places the encounter between the child and the curriculum at the center of educational theory and practice The Third Model is implemented in an alternative classroom called Community of Thinking Teaching and learning in a Community of Thinking is based on three stations the fertile question research and concluding performance The essence of a Community of Thinking is the formation of a group of students and teachers who grapple with a troubling question to which they do not know the answer at the outset and sometimes even at the end of their investigation The Community of Thinking framework is supported by a whole school model the Intel Lect School The model or parts of it is currently implemented in schools in Israel England Australia and New Zealand The book suggests a new pedagogical narrative based on alternative atomic pictures of learning teaching knowledge mind and the aim of education and a systematic pedagogical practice based on this narrative LEARNING AND TEACHING MANGAL, S. K.,MANGAL, SHUBHRA,2019-07-01 The book thoroughly explains various theories and concepts applied in the field of learning and teaching It orderly describes effective techniques and methods by using descriptive analytical approach and methodology It covers in the intelligible form a wide spectrum of information inclusive of that required for the compulsory paper Learning and Teaching incorporated in the curriculum of B Ed courses of various Indian universities in accordance with the guidelines of National Council for Teacher Education NCTE The book discusses the nature and importance of learning theories propagated by behaviourists cognitivists and humanists It also focuses on pedagogy andragogy models of teaching tasks and process of learning strategies of teaching learning styles concepts of e

learning and m learning in the applications of ICT KEY FEATURES Full coverage of syllabi of all the Indian universities Diligently arranged chapters for the sequential learning Comprehensive explanation with illustrative examples and case studies Explicit figures tables and diagrams for easy interpretation Summary at each chapter end for quick review The book is primarily intended to B Ed students Besides the text is also of immense value to the students of B EL Ed M Ed MA Ed M Phil and teachers training professionals and counsellors

Teaching and Learning as a Pedagogic Pilgrimage Nuraan Davids, Yusef Waghid, 2018-10-04 Teaching and Learning as a Pedagogic Pilgrimage is premised on an argument that if higher education is to remain responsive to a public good then teaching and learning must be in a perpetual state of reflection and change It argues in defence of teaching and learning as constitutive of a pedagogic pilgrimage and draws on a range of scholars and theories to explore concepts such as transcendental journeys belief hope and imagination The main objective of the book is to show how teaching and learning ought to be reconsidered in relation to that which lies beyond the parameters of the encounters as well as that which is intrinsic to the encounters This book gives shape to rituals and routines of engagement and debate before extending the limitations in deliberative pedagogic encounters to offer desirable outcomes in which both student and teacher can practice a spiritual take on teaching and learning along a continuum of ongoing action Themes explored in the chapters include the following Faith and deliberative encounters Post human ethics of care in teaching and learning Diffracted teaching and learning This book will be of great interest to academics researchers and post graduate students in the fields of philosophy of education and teaching and learning in the philosophy of education It will also appeal to school and university educators policymakers and prospective teachers

Making Learning Whole David Perkins, 2010-02-04 New in Paperback Make learning more meaningful by teaching the whole game David Perkins a noted authority on teaching and learning and co director of Harvard s Project Zero introduces a practical and research based framework for teaching He describes how teaching any subject at any level can be made more effective if students are introduced to the whole game rather than isolated pieces of a discipline Perkins explains how learning academic subjects should be approached like learning baseball or any game and he demonstrates this with seven principles for making learning whole from making the game worth playing emphasizing the importance of motivation to sustained learning to working on the hard parts the importance of thoughtful practice to learning how to learn developing self managed learners Vividly explains how to organize learning in ways that allow people to do important things with what they know Offers guidelines for transforming education to prepare our youth for success in a rapidly changing world Filled with real world illustrative examples of the seven principles At the end of each chapter Perkins includes Wonders of Learning a summary of the key ideas

Teaching and Learning in the Health Sciences, 2010 **Teaching Kids to Love Learning, Not Just Endure It** Michael Connolly, 2011-05-16 With so much emphasis these days on making students globally competitive and prepared to beat students of other nations on international assessments and with so much talk about academic rigor and emphasis on

rigid accountability measures we are in danger of losing sight of the most fundamental element of successful teaching and learning love Teaching Kids to Love Learning Not Just Endure It makes the case that if we really want no child left behind we must return to the solid foundation on which successful teaching and learning has always rested the love of teacher for her students and they for her and the passion of the teacher for her discipline and her desire to share that passion with her students

Humanizing Distance Learning Paul Emerich France, 2020-11-13 In some ways shouldn't we always be teaching from a distance Paul France asks this not as pitch for distance learning But because part of the reason distance learning has been so challenging Paul asserts is that we're replicating long standing practices that promote dependent learning in our students Why not use this unique moment of time to reconnect with the true purpose of teaching to help our students become liberated learners and free thinkers The next logical step in teachers months long distance learning journey Humanizing Distance Learning describes how to center humanity and equity in our process of reimagining learning Even while teaching and learning miles apart through screens you'll discover how to Build independence within your students so they're better equipped to tackle challenges with persistence and learn how to learn Make collaboration and human connection essential components of your pedagogy offering students the chance to socialize and learn from one another Center and unpack students identities helping them develop a conscious knowledge of themselves all the while using their self identified strengths to overcome any obstacles Plan prepare and implement humanized instruction while teaching for student liberation both digitally and in person Investigate technology integration including the Digital Divide as well as ways to minimize EdTech integration so that our collective sense of humanity can continue to be front and center The future Paul writes may be unclear the road may be rocky and the story may continue to be long and winding as we push forward through this global crisis But the answer will always be simple We must teach and learn in pursuit of a deeper sense of collective humanity and for no other reason This book is equal parts visionary and practical courageous and invitational It addresses foundational needs and wrenching challenges teachers faced during the recent time when U S teachers abruptly found themselves teaching remotely It is a deeply humanizing book Carol Ann Tomlinson William Clay Parrish Jr Professor Emeritus University of Virginia Humanizing Distance Learning is a book for our times not only because it addresses how to build a culture of thinking and teach for understanding at a distance but also because it challenges the status quo of education by offering a more liberated and humane vision Ron Ritchhart Senior Research Associate Harvard Graduate School of Education Paul France has produced a timely and necessary book that will help educators humanize distance learning Recognizing incredible dimensions of complexity this book will surely help educators traverse times of uncertainty in distance learning H Richard Milner IV Cornelius Vanderbilt Chair of Education Vanderbilt University *New Literacies in Action* William Kist, 2005 This book examines the work of pioneers teachers who have transformed their classrooms in an effort to broaden the literacy of their students describing some of the most innovative examples of teaching and learning **Teaching,**

Learning, and Loving Daniel Patrick Liston, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company Handbook of Research on Professional Development for Quality Teaching and Learning Petty, Teresa, Good, Amy, Putman, S. Michael, 2016-06-16 As educational standards continue to transform it has become essential for educators and pre service teachers to receive the support and training necessary to effectively instruct their students and meet societal expectations However there is not a clear consensus on what constitutes teacher effectiveness and quality within the education realm The Handbook of Research on Professional Development for Quality Teaching and Learning provides theoretical perspectives and empirical research on educator preparation and methods for enhancing the teaching process Focusing on teacher effectiveness and support provided to current and pre service educators this publication is a comprehensive reference source for practitioners researchers policy makers graduate students and university faculty

Teaching and Learning: Pedagogy, Curriculum and Culture Alex Moore, 2002-11 Provides an overview of the key issues and dominant theories of teaching and learning as they impact upon the practice of classroom teachers It includes questions points for consideration and ideas for further reading and research
