The book focuses on developing students' mathematics proficiency in the three components of conceptual understanding, procedural fluency, and competence in word problem solving through the MSA approach in every content area. To help students learn a mathematics concept with deep understanding, a variety of concrete or visual models are developed to address the mathematics concept to build fluency in procedure and computation corresponding to the concept; various computational strategies, including basic and specific techniques, are developed to learn how to apply the conceptual understanding and strategies to word problem solving; applications of different types and levels of word problems are introduced.
