*Teaching Development Economics from a Gender Perspective* Gunseli Berik, Yana van der Meulen Rodgers, 2022 An undergraduate course in development economics presents an ideal opportunity to introduce students to the importance of gender differences in economic outcomes This article argues that a systematic integration of gender into development economics courses based on standard textbooks is feasible and desirable We provide a gendered narrative of how to engender a development economics course using as examples topics that are commonly taught and we show how gender aware scholarly articles classroom activities and assignments can complement a course based on a standard textbook or set of articles We engender three main sections of a prototype development economics course meanings and measures of

**Vocational Education Magazine** ,1922 Development Economics as Taught in Developing Countries ,2015 This paper uses a combination of survey questions to instructors and data collected from course syllabi and examinations to examine how the subject of development economics is taught at the undergraduate and masters levels in developing countries and benchmark this against undergraduate classes in the United States The study finds that there is considerable heterogeneity in what is considered development economics there is a narrow core of only a small set of topics such as growth theory poverty and inequality human capital and institutions taught in at least half the classes with substantial variation in other topics covered In developing countries development economics is taught largely as a theoretical subject coupled with case studies with few courses emphasizing data or empirical methods and findings This approach contrasts with the approach taken in leading U S economics departments and with the evolution of development economics research The

analysis finds that country income per capita the role of the state in the economy the education level in the country and the involvement of the instructor in research are associated with how close a course is to the frontier The results suggest there are important gaps in how development economics is taught **The Art of Teaching** Emerson E.
