

4 Fundamental Properties of SPOKEN LANGUAGE

Semantic knowledge, or the knowledge of the different meanings of words, can be acquired through practice of these properties.

HOW DOES OUR BRAIN COMMUNICATE LANGUAGE?

The Phonological System is where about 30 or 40 phonemes out of several hundred are utilized in a certain language.

Phonotactic Rules involve sound patterns that a language permits to make up syllables; whether such syllables can begin or end with vowels or consonants depend on the variations of sound required.

Tone Melodies are the variations in high, low, rising and falling tones that are particular to a language, and which indicate their lexical or discourse nature.

The Stress System is the means by which lexical stress is located and fixed within an utterance. It can find itself in "bounded or syllable-timed" languages like Spanish or Japanese and "unbounded or stress-timed" languages like Arabic and English.
