Department of State,1951      [Complex Ball Quotients and Line Arrangements in the Projective Plane](#) Paula Tretkoff,2016-02-16 This book introduces the theory of complex surfaces through a comprehensive look at finite covers of the projective plane branched along line arrangements Paula Tretkoff emphasizes those finite covers that are free quotients of the complex two dimensional ball Tretkoff also includes background on the classical Gauss hypergeometric function of one variable and a chapter on the Appell two variable  $F_1$  hypergeometric function The material in this book began as a set of lecture notes taken by Tretkoff of a course given by Friedrich Hirzebruch at ETH Zurich in 1996 The lecture notes were then considerably expanded by Hirzebruch and Tretkoff over a number of years In this book Tretkoff has expanded those notes even further still stressing examples offered by finite covers of line arrangements The book is largely self contained and foundational material is introduced and explained as needed but not treated in full detail References to omitted material are provided for interested readers Aimed at graduate students and researchers this is an accessible account of a highly informative area of complex geometry      *Applying the Illuminating Hidden Harvests approach* Food and Agriculture Organization of the United Nations,Duke University,WorldFish,2024-01-23 This document has been adapted from the research protocol used to compile country case study data and to produce the results summarized in the 2023 report titled Illuminating Hidden Harvests The contributions of small scale fisheries to sustainable development hereafter IHH study FAO Duke University and ii is comprehensive yet straightforward and cost effective While originally designed to be conducted at the national level this approach can and should be modified as desired to fit different scales of study and to respond to the particular needs and priorities of individual researchers regions of interest As the name implies the approach was designed to compile existing data on small scale fisheries and not to collect it Rather this approach only reinforces the importance of collecting more detailed data specific to small scale fisheries for example as distinct from large scale fisheries aquaculture and recreational

fisheries in order to help fill the knowledge gap on small scale fisheries contributions to sustainable development Given the vast diversity of small scale fisheries in different countries a standard definition of small scale fisheries is not prescribed here nor in the IHH study researchers should refer to the definitions used in each country context However to better characterize fisheries and the differences among them that often contribute to local definitions of small or large scale fisheries the IHH study and this approach used a fisheries activity characterization matrix This tool provides a characterization of the small scale fisheries subsector at the country level and allows researchers to assess the scale of small scale fishing activities in a more relational manner thus avoiding the imposition of fixed definitions
