The Makeshift Rocket:

The Makeshift Rocket Poul Anderson, 1962 *The Makeshift Rocket* Poul Anderson, 1962 **Sofia the Brave**

Astronaut Claire Foster, 2025-06-19 Sofia the Brave Astronaut tells the inspiring story of a young girl who dares to dream beyond the stars despite the limitations placed on her by society Sofia passionate about space exploration faces constant doubts from her classmates who believe that girls can't be astronauts Unfazed Sofia embarks on a journey of creativity leadership and resilience Through her determination she leads a pretend space mission that captivates her school demonstrating that dreams have no gender limits This empowering tale challenges outdated stereotypes and encourages children to pursue their passions no matter the obstacles Filled with vivid adventures and heartwarming moments Sofia's story inspires young readers to believe in themselves and follow their dreams no matter what others may say **James Van Allen** Abigail Foerstner, 2009-06 Astrophysicist and space pioneer James Van Allen 1914-2006 for whom the Van Allen radiation belts were named was among the principal scientific investigators for twenty-four space missions including Explorer I in 1958 the first successful U.S. satellite Mariner 2's 1962 flyby of Venus the first successful mission to another planet and the 1970s Pioneer 10 and Pioneer 11 missions that surveyed Jupiter and Saturn Although he retired as a University of Iowa professor of physics and astronomy in 1985 he remained an active researcher using his campus office to monitor data from Pioneer 10 on course to reach the edge of the solar system when its signal was lost in 2003 until a short time before his death at the age of ninety-one Now Abigail Foerstner blends space science drama military agendas cold war politics and the events of Van Allen's lengthy career to create the first biography of this highly influential physicist Drawing on Van Allen's correspondence and publications years of interviews with him as well as with more than a hundred other people and declassified documents from such archives as the Jet Propulsion Laboratory the Kennedy Space Center and the Applied Physics Laboratory Foerstner describes Van Allen's life from his Iowa childhood to his first experiments at White Sands to the years of Explorer I until his death in 2006 Often called the father of space science James Van Allen led the way to mapping a new solar system based on the solar wind massive solar storms and cosmic rays Pioneer 10 alone sent him more than thirty years of readings that helped push our recognition of the boundary of the solar system billions of miles past Pluto Abigail Foerstner's compelling biography charts the eventful life and time of this trailblazing physicist **Futuristic Cars and Space Bicycles** Jeremy Withers, 2020-06-04 Given the extensive influence of the transport revolution on the past two centuries a time when trains trams omnibuses bicycles cars airplanes and so forth were invented and given science fiction's overall obsession with machines and technologies of all kinds it is surprising that scholars have not paid more attention to transportation in this increasingly popular genre Futuristic Cars and Space Bicycles is the first book to examine the history of representations of road transport machines in nineteenth twentieth and twenty-first century American science fiction The focus of this study is on two machines of the road that have been locked in a constant often bitter struggle with one another

the automobile and the bicycle With chapters ranging from the early science fiction of the pulp magazine era in the 1920s and 1930s to the postcyberpunk of the 1990s and more recent media of the 2000s such as web television zines and comics this book argues that science fiction by and large perceives the car as anything but a marvelous invention of modernity Rather the genre often scorns and ridicules the automobile and instead promotes more sustainable more benign more restrained technologies of movement such as the bicycle
