Truth, Knowledge and Causation C. J. Ducasse, 2015-05-22 Originally published in 1969 This book examines the fundamental concepts of metaphysics and of theory of knowledge Topics treated include the nature of substance and of causation their relation to natural laws dispositions and attributes the nature of consciousness and purposiveness of symbols signs and signals and their relation to interpretation and objective reference and the nature and criteria of truth The author holds that philosophy is by intent a science and that its becoming so requires precise and non arbitrary semantical analysis of basic philosophical terms He argues that philosophy then like the other sciences has practical importance in its case this consists in its capacity to give to difficult practical decisions not only the efficacy insured by its application of the findings of the other sciences but in addition some of the wisdom which is philosophy s distinctive ultimate aim **Truth, Knowledge and Causation, By C.J. Madden, 2012-12-06 Although a succession of fashions swept the American philosophical scene C J Ducasse was throughout his long career an effective practitioner of analytic philosophy in the classic tradition As he explained in 1924 i t is only with truths about such questions as the meaning of the term true or real or good and the like that philosophy is concerned Such truths are to be discovered inductively by comparing and analyzing concrete cases of the admittedly proper u le The pressing problems of philosophy are thus in my view primarily problems of def mition and moreover problems of framing def mitions which must be in formal terms under penalty of not being otherwise understandable by or acceptable to one or another philosophical school since the formal elements of thought and tp ey only are common to all schools These def mitions of course are not to be arbitrary their relation to the facts of admittedly meaningful linguistic usage is the same as exists between any scientific hypothesis and the facts which it attempts to 1 construe *Theories of Causality* John Losee, 2017-07-28 What types of entities qualify as causes and effects What is the relationship between cause and effect How are causal claims to be assessed The first question deals with the structure of the world the second is about theories that interpret the relationship of causes to effects while the third has to do with proper

procedure in science and everyday life This volume is a wide ranging history of answers that have been given to these three questions and their relationship to scientific understanding Losee presents a number of theories of causality within a historical survey that emphasizes the interrelationship between these theories and developments in science His analysis displays the strengths and weaknesses of these theories so as to contribute to our present understanding of causal relatedness Among the positions discussed are those of Aristotle Hume Kant Mill Salmon Lewis and Woodward Losee s analysis displays the strengths and weaknesses of theories that identify causal relatedness with regularity of sequence probability increase energy transfer exchange of a conserved quantity counterfactual dependence and inferability These theories are judged in part by their ability to resolve difficulties posed by instances of overdetermination causation by omission preventive causation and causation by disconnection Since applications of the theories to these instances disagree a strategy of employing multiple concepts of causation is examined Theories of Causality also describes the particular difficulties for causal analysis posed by quantum mechanics One such difficulty is the prohibition against combining a causal analysis of a quantum process with a spatio temporal description of that process *Sufism* Deepshikha Shahi,2020-06-22 In an effort to attain a global character the contemporary academic discipline of International Relations IR increasingly seeks to surpass its Eurocentric limits thereby opening up pathways to incorporate non Eurocentric worldviews Lately many of the non Eurocentric worldviews have emerged which either engender a derivative discourse of the same Eurocentric IR theories or construct an exceptionalist discourse which is particularly applicable to the narrow experiential realities of a native time space zone as such they fall short of the ambition to produce a genuinely non derivative and non exceptionalist Global IR theory Against this backdrop *Sufism A Theoretical Intervention in Global International Relations* performs a multidisciplinary research to explore how Sufism as an established non Western philosophy with a remarkable temporal spatial spread across the globe facilitates a creative intervention in the theoretical understanding of Global IR **Rescuing Reason** Robert Nola,2003-02-28 Do knowledge and science arise from the application of canons of rationality and scientific method Or is all our scientific knowledge caused by socio political factors or by our interests in the socio political the view of sociologists of knowledge Or does it result from interplay of relations of power the view of Michel Foucault Or does our knowledge arise from the will to power the view of Nietzsche This volume sets out to critically examine the theses of those who would debunk the idea of rational explanation The book is wide ranging The theories of method of Quine Kuhn Feyerabend amongst others are discussed and related to the views of Marx Foucault Wittgenstein and Nietzsche as well as sociologists of science such as Mannheim and Bloor The author provides a wide interpretative framework which links the doctrines espoused by many of these authors it is argued that they inherit many of the difficulties in the Strong Programme in the sociology of knowledge and that they fail to reconcile the normativity of knowledge with their naturalism It is argued that neither relativists sceptics nihilists sociologists of knowledge nor the postmodernists successfully debunk the claims of rational explanation far from it
