## **Tsunami Alert:**

Tsunami Alert! Niki Walker, 2006 Discusses the tsunami and other disasters      Tsunamis E.M. Scourse, N.A. Chapman, D.R. Tappin, S.R. Wallis, 2018-01-05 This Special Publication examines tsunami hazard and risk with particular focus on using the geological record With Earth's growing population clustered increasingly on coastlines tsunami hazards are of concern worldwide The papers explore the sedimentological and dynamic traces of recent and prehistoric tsunamis globally from Europe to the Pacific as well as looking at historic records and how the information can be used to characterise the scale of impacts and areas that are most susceptible to tsunami hazards Armed with this information scientists can begin to quantify risks both to populations and in economic terms This volume is aimed both at scientists working in this field and at a wider community interested in tsunami science and natural hazard assessment      *Natural Disaster Risk Management* Ulrich Ranke, 2015-09-18 This textbook provides a thorough introduction to natural disaster risk management Many aspects of disaster risk management such as those involved in earthquakes volcanic eruptions floods avalanches and mudslides call for similar prevention and preparedness instruments management concepts and countermeasures This textbook assumes the viewpoint of a regional disaster risk manager who is responsible for a certain area and for making the lives of the people who live there safer regardless of the type of natural disaster that may occur The same holds true for boosting preparedness and awareness in the population at risk The book includes numerous examples of hazard mitigation concepts and techniques as well as ways of intensively involving the local population in prevention schemes at an early stage Furthermore it provides an in depth examination of the function of risk communication both as an instrument for disseminating official information and as a function of public media In closing a chapter on risk splitting offers insights into insurance based models for risk financing This comprehensive book is a must read for all students researchers and practitioners dealing with natural disaster risk management      **Water and Urban Development Paradigms** Jan Feyen, Kelly Shannon, Matthew Neville, 2008-09-03 Communication across and integration of disciplines in the urban water sector seems today more imperative than ever before Water is a strategic and shrinking resource It is probably the world's most valuable resource and clean water has even been touted as the next oil Control of water from access to management has always been a      **Special Report - Coastal Engineering Research Center** Coastal Engineering Research Center (U.S.), 1980      **Tsunami Newsletter**, 2006
