

# TRUCKS MAKE WIDE TURNS

**DON'T CROWD AN INTERSECTION**

**INTERSECTION:** Many intersections are marked with stop lines, indicating where a driver must come to a complete stop. Crowding an intersection leaves your vehicle exposed to vehicles that are attempting to turn.

**WATCH FOR INDICATOR**

**WATCH** the truck's turning signal to see what the driver intends to do.

**SNEAKING ALONGSIDE CAN BE FATAL:** Don't try to sneak to the side and squeeze around trucks - it may be the last mistake you'll ever make.

**SNEAKING ALONGSIDE**

**WAIT** for the truck to make its turn first as the truck's turn signal may not be working.

**STOP, WAIT AND WATCH**

**STAY BACK** at least a car length when stopping behind a truck.

**STAY BACK**

The infographic features a central road with a dashed white line. A large blue truck is shown making a wide right turn. A red car is positioned in the intersection, with a red dashed arrow pointing to a red circle containing the text 'DON'T CROWD AN INTERSECTION'. A text box explains that crowding an intersection is dangerous. To the right, a green box with a green circle says 'WATCH FOR INDICATOR' and 'WATCH the truck's turning signal to see what the driver intends to do.' Below this, an orange circle says 'SNEAKING ALONGSIDE' and a text box warns that sneaking around trucks is fatal. Further down, a purple circle says 'STOP, WAIT AND WATCH' and a text box says 'WAIT for the truck to make its turn first as the truck's turn signal may not be working.' At the bottom right, a blue circle says 'STAY BACK' and a text box says 'STAY BACK at least a car length when stopping behind a truck.' Another blue circle with 'STAY BACK' is also present. The background is a mix of green and brown tones.

**Annual Report of the Chief of Engineers to the Secretary of War for the Year ...** United States. Army. Corps of Engineers,1880     **Downhill ski technique, step by step** Janos Koranyi,2019-04-20 This book is especially written for all insecure skiers in the first place If you think that you are a beginner or an intermediate skier this book is thought to be the right choice for you But everyone interested in understanding developing learning and teaching downhill skiing can benefit from this work I have been working on this material since 2010 and the work is still going on My basic point is that you should prepare yourself before you go to ski It is too late to make your mental preparation on the slopes this should be done at home before You should be able to imagine for yourself what you must do in order to do it right or as good as possible This imagination should not be just a picture It should be like a whole movie with many of your senses involved just like in a detailed dream Like if you can imagine the whole ski turn with many clear details what basic movements you have to do how it should feel in your body how it should look like how it should change during the development of your turn this will prepare your correct movements in the real life But this must happen step by step starting by the easiest skills and developing further when you have tried out the first steps first For this reason I have divided the material in 3 different levels You will need quite a long time for this So please be patient take your time work with my book do not just read it Understanding and explaining skiing is complicated and it takes time My suggestion is to read carefully take several breaks and think carefully about the sections you find difficult to understand If you are a beginner start reading the book as soon as possible before your start your skiing You can stop reading after the beginner level and go skiing on green and blue slopes The homepage of the book <https://skiingtechnique.wordpress.com> If this link does not work write the link into an internet browser google or other You can also find a short free book about downhill ski tech on my homepage     *Annual Report of the Secretary of War* United States.
