Wild Enchantment Kate Proctor,1989-01-01 *Cohabiting Earth* Joe Gray,Eileen Crist,2024-11-01 The eco catastrophes that we are witnessing today starkly demonstrate how the interests of the Earth s currently dominant species are in lockstep with those of nature s wider whole Simply stated humans and the more than human world have a shared fate Just as humanity s unrestrained overreach in the ecosphere is driving a mass extinction event and causing the devastation of lifeforms and places so it is also jeopardizing the prospect of a human future worth living There is no humans versus nature tradeoff the wellbeing of both is inseparably entwined Solutions to the shared predicament of all Earth s beings will thus necessarily be those that strive for harmony between human presence and the rest of nature This applies to the philosophy we adopt for agriculture the ways in which human economies operate our patterns of consumption and numerous other intertwined threads of our existence This anthology argues that harmony between humanity and our home planet must be built on the pillars of restraint respect and reverence
