Using Computers In Mathematics:

Using Information Technology in Mathematics Education James Tooke, Norma Henderson, 2024-11-15 Computers have changed the ways that mathematics are taught and learned Is your institution taking advantage of what today s technology offers With contributions from researchers and practitioners alike Using Information Technology in Mathematics Education explores the impact of the computer on the curriculum the teaching and learning of mathematics and the professional development of teachers both pre service and in service As editor James Tooke states The connection between mathematics and the computer is obvious Elementary notions of mathematics gave rise to the computer advanced notions gave it a more powerful state As the computer advanced it expanded mathematics allowing the creation of further branches of the field for instance fractal geometry had no reality until the advent of high speed computers In its look at the relationship between mathematics the computer and mathematics education Using Information Technology in Mathematics Education addresses the computer as a vehicle for teaching calculus at Texas A M includes reports from several programs that have utilized the computer when teaching mathematics at lower levels of content than calculus such as intermediate algebra and geometry examines the computer s role in student learning probability discusses the use of computers in the professional development of teachers explores ways to use computers to reduce mathematics anxiety Using Information Technology in Mathematics Education examines the history and impact of computers in mathematics and mathematics education from the early crude computer assisted instruction efforts through LOGO software for elementary schools through MAPLE for the university to the Web based calculus courses now being offered by outstanding universities Use it to facilitate learning and teacher growth in your institution

Learning from Computers: Mathematics Education and Technology

Christine Keitel-Kreidt, Kenneth Ruthven, 2012-12-06 The NATO Advanced Research Workshop on Mathematics Education and Technology was held in Villard de Lans France between May 6 and 11 1993 Organised on the initiative of the BaCoMET Basic Components of Mathematics Education for Teachers group Christiansen Howson and Otte 1986 Bishop Mellin Olsen and van Dormolen 1991 the workshop formed part of a larger NATO programme on Advanced Educational Technology Some workshop members had already participated in earlier events in this series and were able to contribute insights from them similarly some members were to take part in later events The problematic for the workshop drew attention to important speculative developments in the applications of advanced information technology in mathematics education over the last decade notably intelligent tutoring geometric construction symbolic algebra and statistical analysis Over the same period more elementary forms of information technology had started to have a significant influence on teaching approaches and curriculum content notably arithmetic and graphic calculators standard computer tools such as spreadsheets and databases and computer assisted learning packages and computer microworlds specially designed for educational purposes
