William Tenney Brewster, 1909 The Oxford Handbook of Event Structure Robert Truswell, 2019-03-21 This handbook deals with research into the nature of events and how we use language to describe events The study of event structure over the past 60 years has been one of the most successful areas of lexical semantics uniting insights from morphology and syntax lexical and compositional semantics cognitive science and artificial intelligence to develop insightful theories of events and event descriptions This volume provides accessible introductions to major topics and ongoing debates in event structure research exploring what events are how we perceive them how we reason with them and the role they play in the organization of grammar and discourse The chapters are divided into four parts the first covers metaphysical issues related to events the second is concerned with the relationship between event structure and grammar the third is a series of crosslinguistic case studies and the fourth deals with links to cognitive science and artificial intelligence more broadly The book is strongly interdisciplinary in nature with insights from linguistics philosophy psychology cognitive science and computer science and will appeal to a wide range of researchers and students from advanced undergraduate level upwards The Structure and Growth of the Scales of Fishes in Relation to the Interpretation of Their Life-history Carl Leavitt Hubbs, Charles William Creaser, Donald Joyce

my thesis and finally what impact the fabula construction in Memento has on his viewers Causes and their effects are basic to narrative but they take place in time This quotation from Bordwell s and Thompson s work Film Art an Introduction does not only show a fundamental principle of narration but furthermore depicts a possibility to manipulate the spectator s understanding of a story Christopher Nolan s Memento is one example of what a complex narration can be The film shows two separate stories of Leonard an ex insurance investigator who suffers anterograde amnesia and attempts to find the murderer of his wife which is the last thing he can remember On the one hand there is a forward moving storyline the black and white scenes while the other one the colour sequences tells the story backwards Although the story behind the film is rather simple the narrative structure is extremely complex and clever which demands constant attention from its spectators This term paper will deal with the methods used in Memento which mislead the audience s understanding of the story My thesis is therefore Narrative complexity in Christopher Nolan s Memento Narrative structure Narrator s unreliability fabula construction and cinematography as key elements for the spectator s manipulation Apart from the film Memento the central literature I will work with is the essay by Stefano Ghislotti Narrative Comprehension Made Difficult Film Form and Mnemonic Devices in Memento the documentary Anatomy of a Scene about the making of Memento a text by Andy Klein named Everything You Wanted to Know about Memento and different filmic narrativity by Jakob Lothe David Herman and Edward Branigan In addition to that there is a self generated sequence analysis attached to the term paper in order to have an overall view of the scenes I take a closer look at

Event Structure Jan Voorst,1988-01-01 This study establishes a relation between the semantics of the subject and the direct object NP and aspect The notion of event is central Events have a beginning and an end This means in temporal terms that events have a point in time at which they begin and a point in time at which they end However events are not defined in temporal terms but in spatial terms This means that they are defined in terms of the entity that can be used to identify their beginning and the entity that can be used to identify their end These two entities are denoted by the subject and the direct object NP respectively The name of the event is provided by the verb It is these three notions that make up Event Structure the entity denoting the beginning i e the object of origin the entity denoting the end i e the object of termination and the event itself The three primitives are independently motivated in the domain of tense interpretations of sentences Their presence or absence affects these interpretations in a systematic way
