Davies,2016-02-17 Change programmes in both private and public sectors have a poor record of delivering their intended value The reasons given most often for their failure include lack of executive support or buy in from key users loose requirements definition weak programme management and plain wishful thinking They rarely include technical limitations Value Management puts forward the view that the true problem lies in failing to understand the causal links between the intended stakeholder outcomes and the actual programme outputs Repeating the pattern of failure can be avoided by asking two questions Before implementation what capabilities must a change programme deliver when and in what order so as to cause intended value against a defined purpose with speed and certainty During and after implementation what minor adjustments and or major shifts are needed to be certain that the programme remains on purpose and on value and two answers to be given Target time and align change programmes to deliver maximum intended value to stakeholders the baseline business case track and respond to changes during and beyond implementation to ensure that the programme actually delivers or exceeds intended value value realisation The authors show how by asking and answering these questions direction and delivery of any programme can be clarified and greater economic value achieved The 2007 Pfeiffer Annual Elaine Biech,2007 The 2007 Pfeiffer Annual Consulting is a ready made toolkit of ideas methods techniques and models that assist and support your work as an organizational consultant The materials provide highly accessible means of interacting with a diverse variety of systems and processes from collaborative work systems and executive coaching to strategic planning and organization development

Next Generation Management Development Robert D. Cecil, William J. Rothwell, 2007 This innovative comprehensive and fully integrated management development program provides a vehicle for enabling managers and leaders to participate more effectively in their organization's OD processes. The concepts, models, tools, and other materials have been used successfully to train managers, leaders, and MD/OD personnel in organizations such as IBM, AT&T, Kraft, Baxter Labs, Sears, Caterpillar, and the U.S. Navy, Army, and Air Force. The accompanying CD-ROM contains customizable tools for OD consultants and facilitators, as well as additional chapter material.

NL ARMS Netherlands Annual Review of Military Studies 2019 Wim Klinkert, Myriame Bollen, Marenne Jansen, Henk de Jong, Eric-Hans Kramer, Lisette Vos, 2019-07-16 This book has as its subject matter the academic education of officers and builds on the signing of the Bologna Declaration in 1999 by twenty-nine European ministers for Education and Science who thereby agreed to coordinate higher education across Europe by, for instance, the implementation of the Bachelor's and Master's system. In the meantime, military academies have also introduced the BaMa system into their programs for officers' education, which marks a transition from the old days when officers' education took place within a national military system under military command and was firmly grounded in principles, traditions, and needs as professed by the Ministries of Defence and the armed forces in particular. So the Bologna Declaration can be seen as crucial leverage for the development of in-house academic degree programs as a fundamental part of officers' education. With this volume, the editors of NL ARMS 2019 strive to offer a platform to both academics and military and civilian practitioners, as well as to combinations of these, to reflect and share their thoughts on officers' education before and after Bologna, both in The Netherlands and abroad. To this end, controversies and challenges affecting various aspects and systems of officers' education have been grouped into five themes. Respectively, the first four themes comprise institutional settings and change, educational philosophy, educational challenges, and reflective practices and didactical solutions. The fifth theme, international perspectives, provides insights into the strategic environments and challenges faced by sister academies, as well as ways to further officers' education across Europe, such as offered by Erasmus programs. All the editors of this year's volume are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda, The Netherlands.

ICT Education Janet Liebenberg, Stefan Gruner, 2017-11-17 This book constitutes the refereed proceedings of the 46th Annual Conference of the Southern African Computer Lecturers Association on ICT Education (SACLA 2017) held in Magaliesburg, South Africa, in July 2017. The 22 revised full papers presented together with an extended abstract of a keynote paper were carefully reviewed and selected from 63 submissions. The papers are organized in topical sections on ICT students of a new generation, technology and gaming in nowadays education, educational cooperation with the ICT industry, computer programming education, ICT courses and curricula.
