Kurtz, 1987-03-27 An introduction to computer programming via well structured BASIC Assuming no prior knowledge of BASIC this book presents the fundamentals of programming then shows through examples and problems how algorithmic processes from many fields can be transcribed into computer programs Emphasis is on use of subroutines and on collections of external subroutines called libraries as well as on use of top down design Section on programming techniques includes advice on how to design code test and debug large programs Contains varied applications text mathematical business games graphics and music Introduction to BASIC Programming Peter B. Worland, 1979 **Structured Programming Using Turbo BASIC** Wade Ellis, Ed Lodi, 2014-05-10 Structured Programming Using Turbo BASIC explains programming methods using this language through mathematical or business examples and problems The book approaches problem solving using a top down structured programming method This method consists of 1 breaking a problem into smaller more manageable tasks and 2 using the action block the decision block and the loop block the three fundamental programming structures to perform each task The text describes the Turbo Basic environment on an IBM PC or compatible the fundamental programming structures and concepts the two data structures arrays files graphics creation as well as computer simulations The book explains in detail variables screen formatting the decision block the loop block functions The text also discusses parameter lists and libraries The student learns to use the OPEN statement to associate a buffer with a file or the CLOSE statement to end the file buffer The text explains the use of the Turbo BASIC random generator that produces unique sequences of random numbers The book can be used in introductory lecture courses in business computer science or mathematics It can be beneficial for students in an open entry open exit computer laboratory courses or for self study Structured BASIC Applied to Technology Thomas A. Adamson, Kenneth C. Mansfield, James L. Antonakos, 1997 Assuming no prior programming experience this edition introduces the concept of structured programming through BASIC and includes coverage of QBASIC It uses BASIC to teach the good programming habits required by higher level languages such as C or Pascal and presents programming in a manner that requires consistent program structure and uses top down design It includes examples and problems presented in the context of technical applications with each area of technology clearly defined to stimulate student interest and illustrates new concepts by guiding students through fundamental examples rather than bogging them down in mathematical complexities or technical details **Fundamentals of BASIC Programming** Steven L. Mandell, Colleen J. Mandell, 1985 A textbook emphasizing structured programming as it explains how to use the computer language BASIC to write fundamental programs Includes vocabulary lists learning checks summary points tests and a glossary **Structuring Programs in Microsoft BASIC** Michael J. Cox, 1986 *Structured BASIC Programming for the IBM and MS-DOS PCs* Sang-jin Yu, Steven L. Mandell, 1988 **Structured Programming with COBOL Examples** Earl H. Parsons, 2002-11 As the

conversion of legacy systems continues the ability to understand embedded business rules becomes more and more critical This ability is directly related to the structure of the programs within those systems We also see the need to teach structured programming to a new generation of programmers who must maintain the billions of lines of existing COBOL code The ultimate purpose of this text is to discuss how to judge the level of structure of a program We do this by defining structured programming and then discussing how a structured program can be built through the application of the concepts of coupling and cohesion We also show how embedded business rules of the program can be separated from the data and presentation functions The reader will be able to use to these skills to judge and to improve the structure of a new program or an existing program
