Third Generation Distributed Computing Environments Amjad Umar, 2004 Umar provides a collection of powerful services to support the e business and m business initiatives of today and tomorrow Computer Books **Service Provision** Kenneth J. Turner, Evan H. Magill, David J. Marples, 2004-05-21 This book provides the first overview of the service technologies available to telecoms operators working in a post convergence world Previous books have focused either on computer networks or on telecoms networks This is the first to bring the two together and provide a single reference source for information that is currently only to be found in disparate journals tool specifications and standards documents In order to provide such broad coverage of the topic in a structured and logical fashion the book is divided into 3 parts The first part looks at the underlying network support for services and aims to explain the technology that makes the user visible services possible This section covers multimedia networking both traditional legacy and future softswitch call processing intelligent networks the Internet and Wireless networks Part 2 deals with how these services may be analysed and managed Chapters cover topics such as commercial issues service management quality of service security standards and APIs Part 3 concludes the book by looking ahead at evolving technologies and more speculative possibilities discussing the kinds of services that may be possible in the future and the technologies that will support them Focuses is on how the technology supports the services rather than on technology for its own sake Contributors drawn from both academia and industry companies such as Marconi BT Telcordia Cisco Analysys to give both theoretical and real world perspectives Unique single reference source for a wide range of material currently found only in disparate papers specs and documentation Covers brand new technologies such as JAIN JTAPI Parlay IP multimedia networking active networks WAP wireless LANs agent based services etc **High Performance Distributed Computing**, 2001 The proceedings from the August 2001 conference in San Francisco comprise 39 papers and nine posters on such topics as grid middleware management of large databases security network Qos metascheduling performance resource discovery problem solving environments support for network applications network monitoring parallel and distributed algorithms and application scheduling Author index only c Book News Inc

Parallel and Distributed Computing Claudia Leopold,2001 An all inclusive survey of the fundamentals of parallel and distributed computing The use of parallel and distributed computing has increased dramatically over the past few years giving rise to a variety of projects implementations and buzzwords surrounding the subject Although the areas of parallel and distributed computing have traditionally evolved separately these models have overlapping goals and characteristics Parallel and Distributed Computing surveys the models and paradigms in this converging area of parallel and distributed computing and considers the diverse approaches within a common text Covering a comprehensive set of models and paradigms the material also skims lightly over more specific details and serves as both an introduction and a survey Novice readers will be able to

quickly grasp a balanced overview with the review of central concepts problems and ideas while the more experienced researcher will appreciate the specific comparisons between models the coherency of the parallel and distributed computing field and the discussion of less well known proposals Other topics covered include Data parallelism Shared memory programming Message passing Client server computing Code mobility Coordination object oriented high level and abstract models And much more Parallel and Distributed Computing is a perfect tool for students and can be used as a foundation for parallel and distributed computing courses Application developers will find this book helpful to get an overview before choosing a particular programming style to study in depth and researchers and programmers will appreciate the wealth of information concerning the various areas of parallel and distributed computing
