Testing Teachers:

Testing for Teachers Henry Edward Garrett, 1959
Rudner, 1987
What's Happening in Teacher Testing Lawrence M. Briffa, 2018-04-27
Teacher Involvement in High-Stakes Language Testing Daniel Xerri, Patricia Vella Briffa, 2018-04-27
This book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement. This is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership. The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices. The book also considers the arguments against teacher involvement e.g. the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable. Using contributions from a wide range of international educational contexts the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing. It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy. Moreover teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices. High stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers which ultimately benefits all their students.

Mental Tests and the Classroom Teacher Virgil Everett Dickson, 1923
Smart Tests Catherine M. Walker, Edgar Schmidt, Kat Mototsune, 2004
High stakes accountability and the growing move towards standardized testing are placing teacher knowledge and assessment skills under ever increasing scrutiny. Teachers know what is going on in their classrooms and have first hand reliable evidence of what their students can accomplish. They can be the major factor in student assessment and help their students better demonstrate what they have learned. Smart Tests shows educators how to create well structured evaluation tools that match assessment tasks to the purpose and content of instruction. Teachers learn how to relate testing directly to classroom goals and activities and make assessment an integral part of learning and teaching not just the end result. They will find the information they need to build assessment tasks that give students in grades K-8 the opportunity to succeed. These tasks encourage students to apply new knowledge, reflect and defend their thoughts and opinions and connect what they learn to the world beyond the classroom.

Problems in Mental Testing Guy Montrose Whipple, 1925
Testing Teacher Candidates National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Center for Education, Committee on Assessment and Teacher Quality, 2001-10-19
Americans have adopted a reform agenda for their schools that calls for excellence in teaching and learning. School officials across the nation are hard at work targeting instruction at high levels for all students. Gaps remain however between the nation's educational aspirations and student

achievement To address these gaps policy makers have recently focused on the qualifications of teachers and the preparation of teacher candidates This book examines the appropriateness and technical quality of teacher licensure tests currently in use evaluates the merits of using licensure test results to hold states and institutions of higher education accountable for the quality of teacher preparation and licensure and suggests alternatives for developing and assessing beginning teacher competence Teaching is a complex activity Definitions of quality teaching have changed and will continue to change over time as society s values change This book provides policy makers teacher testers and teacher educators with advice on how to use current tests to assess teacher candidates and evaluate teacher preparation ensuring that America s youth are being taught by the most qualified candidates
