

# WHAT IS EVOLUTION?

**Evolution** refers to the gradual process of change and development in living organisms over time.

Through **evolution**, species adapt to their environment, experiencing modifications in their physical and biological characteristics over generations.

This occurs due to natural selection, where individuals with favorable traits have a greater chance of surviving and reproducing, passing on their genes to the next generations.

**Evolution** is a continuous process that has resulted in the diversity of life forms that exist on our planet.
