Secure Computer and Network Systems Nong Ye,2008-04-15 Computer and network systems have given us unlimited opportunities of reducing cost improving efficiency and increasing revenues as demonstrated by an increasing number of computer and network applications Yet our dependence on computer and network systems has also exposed us to new risks which threaten the security of and present new challenges for protecting our assets and information on computer and network systems The reliability of computer and network systems ultimately depends on security and quality of service QoS performance This book presents quantitative modeling and analysis techniques to address these numerous challenges in cyber attack prevention and detection for security and QoS including the latest research on computer and network behavior under attack and normal use conditions new design principles and algorithms which can be used by engineers and practitioners to build secure computer and network systems enhance security practice and move to providing QoS assurance on the Internet mathematical and statistical methods for achieving the accuracy and timeliness of cyber attack detection with the lowest computational overhead guidance on managing admission control scheduling reservation and service of computer and network jobs to assure the service stability and end to end delay of those jobs even under Denial of Service attacks or abrupt demands Secure Computer and Network Systems Modeling Analysis and Design is an up to date resource for practising engineers and researchers involved in security reliability and quality management of computer and network systems It is also a must read for postgraduate students developing advanced technologies for improving computer network dependability

Communication and Computing for Distributed Multimedia Systems Guojun Lu,1996 The issues and technology of developing networked multimedia systems are explored The author explains color specification and its role in

achieving high picture quality high compression ratio and high information retrieval performance Group Coordination Support in Networked Multimedia Systems Hans-Peter Dommel,1999 Advances in computer hardware and networking technology have incited the deployment of large scale group oriented applications for delivery or interactive development of multimedia content in the Internet There is a growing number of protocols and techniques for group communication and membership services in the IP multicast framework however group coordination support for telecollaborative tasks such as videoconferencing or distributed interactive simulation has received little attention In this dissertation we address network control and coordination functions to orchestrate synchronous multimedia groupwork establishing a sharing discipline on multimedia resources and guaranteeing consistency of distributed activities with ordered multicasting We introduce a formal framework for group coordination and a turn taking abstraction useful for evaluating coordination protocols Elemental design choices for group coordination architectures and the concept of aggregated processing of coordination information are discussed Multimedia Database Management Systems Guojun Lu,1999 Traditional database management systems can t handle the demands of managing multimedia data with the rapid growth of multimedia platforms and the world wide web database management systems must now process store index and retrieve alphanumeric data bitmapped and vector based graphics and video and audio clips both compressed and uncompressed The comprehensive systematic approach of Multimedia Database Management Systems presents you with current and emerging methods for managing the increasing demands of multimedia databases and their inherent design and architecture issues OnTheInternet ,1995 Information Society Technologies ,1999 Multimedia Networking Technologies, Protocols, and Architectures Ivan Vidal,Ignacio Soto,Albert Banchs,Jaime Garcia-Reinoso,Ivan Lozano,Gonzalo Camarillo,2019-01-31 This practical resource provides a survey on the technologies protocols and architectures that are widely used in practice to implement networked multimedia services The book presents the background and basic concepts behind multimedia networking and provides a detailed analysis of how multimedia services work reviewing the diverse network protocols that are of common use to implement them To guide the explanation of concepts the book focuses on a representative set of networked multimedia services with proven success and high penetration in the telecommunication market namely Internet telephony Video on Demand VoD and live IP television IPTV Contents are presented following a stepwise approach describing each network protocol in the context of a networked multimedia service and making appropriate references to the protocol as needed in the description of other multimedia services This book also contains questions and exercises to provide the reader with insight on the practical application of the explained concepts Additionally a laboratory practice is included based on open source tools and software to analyze the operation of an Internet telephony service from a practical perspective as well as to deploy some of its fundamental components Technological Strategies for Protecting Intellectual Property in the Networked Multimedia Environment Interactive Multimedia Association Intellectual Property Project,1994 Windows Developer's Journal ,1996

Proceedings ,1997 **Computer Networks and Internets** Douglas Comer,1999 Now with a new chapter on long distance digital circuits and wireless technologies this book offers a comprehensive self contained tour through the world of networking
