

Text Entry for Mobile Computing: Models and Methods, Theory and Practice

I. Scott MacKenzie and R. William Soukoreff
York University

ABSTRACT

Text input for mobile or handheld devices is a flourishing research area. This article begins with a brief history of the emergence and impact of mobile computers and mobile communications devices. Key factors in conducting sound evaluations of new technologies for mobile text entry are presented, including methodology and experiment design. Important factors to consider are identified and elaborated, such as focus of attention, text creation versus text copy tasks, novice versus expert performance, quantitative versus qualitative measures, and the speed–accuracy trade-off. An exciting area within mobile text entry is the combined use of Fitts’ law and a language corpus to model, and subsequently optimize, a text entry technique. The model is described, along with examples for a variety of soft keyboards as well as the telephone keypad. A survey of mobile text entry techniques, both in research papers and in commercial products, is presented.

I. Scott MacKenzie is a computer scientist with an interest in human–computer interaction, especially human input to computing systems and human performance measurement and modeling; he is an Associate Professor in the Department of Computer Science at York University. **R. William Soukoreff** is a computer scientist with an interest in human–computer interaction; he is a graduate student in the Department of Computer Science at York University.

Text Entry for Mobile Computing I. Scott MacKenzie, 2003-07-30 The four articles in this special issue of Human Computer Interaction describe recent research in mobile text entry The issue begins with a review article that provides general comments on methodologies for evaluating new text entry techniques The next two articles present Dasher a text entry technique with an interface driven from continuous two dimensional gestures and a detailed extension to the prediction model of Soukoreff and MacKenzie The final article takes a completely different approach to modeling the text entry task As a collection the articles represent a sample of promising research initiatives in text entry for mobile computing

Text Entry Systems I. Scott MacKenzie, Kumiko Tanaka-Ishii, 2010-07-28 Text Entry Systems covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements a discussion of the history and current state of the art of entry systems and specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users Text entry has never been so important as it is today This is in large part due to the phenomenal relatively recent success of mobile computing text messaging on mobile phones and the proliferation of small devices like the Blackberry and Palm Pilot Compared with the recent past when text entry was primarily through the standard qwerty keyboard people today use a diverse array of devices with the number and variety of such devices ever increasing The variety is not just in the devices but also in the technologies used entry modalities have become more varied and include speech recognition and synthesis handwriting recognition and even eye tracking using image processing on web cams Statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry increasingly the way people communicate This book covers different aspects of text entry systems and offers prospective researchers and developers Global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements History and current state of the art of entry systems including coverage of recent research topics Specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users

the two main approach of the evaluation empirical user testing and model based evaluation A platform is presented for empirical user tests The platform aims to shorten the evaluation time and make the evaluation more reproducible and generalizable It s implemented on mobile device and equipped with many existing entry methods It also facilitates the implementation of a new idea for text entry New ideas can be tested by comparison to the already implemented methods The platform also includes valuable tools for the evaluation One tool is provided to help in the creation of a set of test phrases that represent a given language Another tool is for automating the most common analysis in text entry tests We presented a framework to identify classify and model the different operation in the text entry process on mobile devices It divides the process to two stages action planning stage and execution stage The action planning stage studies how the word or the text to be typed is mapped to the physical actions allowed by the entry system used The execution stage concerns the primitive tasks the user should done to produce text Some measures are proposed for the evaluation of the two stages The framework also identifies the different entities that should be taken into account during the evaluation Model based evaluation requires human performance models for the primitive tasks used in the entry process We studied three tasks frequently used in the execution stage of the entry process word disambiguation word selection from a list and tilt based interaction We present an algorithm and design guidelines for the design of efficient ambiguous keyboard layout A model for the selection of a word from a word list is constructed from an experimental study Another model for pointing and scrolling using tilt sensor on a mobile device is also presented Finally we present new design directions for the action planning stage that we think more interesting when compared to current designs They are based on knowledge we already have about our life and about the text we write They use this knowledge to allow typing a word in a more direct way compared to typing it letter by letter as it s the case in the current designs We provide two implementations to help the concretization of the concepts presented in that part of Page 6 Abstract Text entry interfaces on mobile devices Modeling design and evaluation PhD thesis 2009 the thesis The first shows how our knowledge can be used to type frequent words through using pictographs The second exploits language syntax to enable the user to type fast and to protect her him from committing typing errors The two implementations employ a specially constructed text prediction engine It implements language redundancy in storage efficient data structures It introduces the concept of meaning concept object action relation etc and separates it from its lexical representation in a given language *Journal of Information Science and Engineering* ,2006 **Fourth IEEE Workshop on Mobile Computing Systems and Applications** ,2002 Representing the proceedings of the June 2002 conference in Callicoon New York this slender volume contains fourteen papers on location and security implementing mobility aggregation and routing data and its context and adaptation An abstract is provided for each and b w illustrations support most of the papers Contributors include American and a few British researchers in academia and industry Only authors are listed in the index Annotation copyrighted by Book News Inc Portland OR **Multiple User Interfaces** Ahmed

Text Entry For Mobile Computing Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Text Entry For Mobile Computing PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning.

By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Text Entry For Mobile Computing PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Text Entry For Mobile Computing free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole. So why not unlock a world of knowledge today? Start exploring the vast sea of free PDF books and manuals waiting to be discovered right at your fingertips.
