Software Development Using Java A Case Study Approach:

Software Development Davide Brugali, Marco Torchiano, 2005 In order to be able to write good software students will need to be familiar with a range of techniques good programming practice experience of problem solving familiarity with development methodologies and knowledge of software processes This book takes a new approach to the teaching of software development Using a collection of case studies it takes the student through the whole life cycle of building an application starting at problem formulation requirements analysis system design and the detail of the Java coding and testing Each case study exploits object oriented concepts and techniques incrementally with each case application getting more complex than the one before it traces the path from problem statement through to implementation of the solution giving guidance that is useful in subsequent case studies gives a conceptual roadmap where the student can follow the development of an application and use those general principles in future software development uses a different methodology from a stand alone application computer simulator to a distributed system messaging server through to a more complex system workflow management system

Object-oriented Software Development Using Java Xiaoping Jia, 2003 Jia software engineering DePaul University helps readers develop skills in designing software and especially in writing object oriented programs using Java The text provides broad coverage of object oriented technology including object oriented modeling using the Unified Modeling Language UML object oriented design using design patterns and object oriented programming using Java This second edition offers expanded coverage of design patterns enhanced material on UML and a new introduction to the iterative software development process made popular by extreme programming Learning features include chapter summaries exercises and projects

Diving into Eclipse Web Perspective Dr Poornima G. Naik , Dr Kavita S Oza, N A *Modern Software Development Using Java* Paul T. Tymann, G. Michael Schneider, 2008 Now updated for the latest release of Java the Second Edition of *Modern Software Development Using Java* continues to blaze a new path for today's CS2 students Tymann and Schneider's contemporary approach focuses on what students need to learn in the CS2 course in order to appreciate what is truly important today in the areas of software design and development This text covers such current software development ideas as object oriented design UML data structure libraries net centric programming threads and GUIs all presented in a way that is fully accessible and motivating The new edition has been fully revised to take advantage of the new features in Java 5.0 and all material is Java 6.0 compliant

ECIC2014-Proceedings of the 6th European Conference on Intellectual Capital Dagmar Cagaňová, Miloš Čambál, 2014-10-04 *Advances and Innovations in Systems, Computing Sciences and Software Engineering* Khaled Elleithy, 2007-08-28 *Advances and Innovations in Systems Computing Sciences and Software Engineering* includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computing Sciences Software Engineering and Systems *Advances and Innovations in Systems Computing Sciences and Software Engineering* includes selected papers from the conference

proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 2006 which was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2006 All aspects of the conference were managed on line not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 70 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session
