Explaining Knowledge Rodrigo Borges, Claudio de Almeida, Peter D. Klein, 2017-11-24 The Gettier Problem has shaped most of the fundamental debates in epistemology for more than fifty years Before Edmund Gettier published his famous 1963 paper it was generally presumed that knowledge was equivalent to true belief supported by adequate evidence Gettier presented a powerful challenge to that presumption This led to the development and refinement of

many prominent epistemological theories for example defeasibility theories causal theories conclusive reasons theories tracking theories epistemic virtue theories and knowledge first theories The debate about the appropriate use of intuition to provide evidence in all areas of philosophy began as a debate about the epistemic status of the Gettier intuition The differing accounts of epistemic luck are all rooted in responses to the Gettier Problem The discussions about the role of false beliefs in the production of knowledge are directly traceable to Gettier's paper as are the debates between fallibilists and infallibilists Indeed it is fair to say that providing a satisfactory response to the Gettier Problem has become a litmus test of any adequate account of knowledge even those accounts that hold that the Gettier Problem rests on mistakes of various sorts This volume presents a collection of essays by twenty six experts including some of the most influential philosophers of our time on the various issues that arise from Gettier's challenge to the analysis of knowledge

Explaining Knowledge sets the agenda for future work on the central problem of epistemology

Seeing and Saying Berit Brogaard, 2018-06-15 In this book Brit Brogaard defends the view that visual experience is like belief in having a representational content Her defense differs from most previous defenses of this view in that it begins by looking at the language of ordinary speech She provides a linguistic analysis of what we say when we say that things look a certain way or that the world appears to us to be a certain way She then argues that this analysis can be used to argue for the view that visual experience has a representation content that mediates between you and the world when you visually perceive
