Kaba, David Wastell, 2006-08-18 1 Jean Claude Derniame Software process technology is an emerging and strategic area that has already reached a reasonable degree of maturity delivering products and significant industrial experiences This technology aims at supporting the software production process by providing the means to model analyse improve measure and whenever it is reasonable and convenient to automate software production activities In recent years this technology has proved to be effective in the support of many business activities not directly related to software production but relying heavily on the concept of process i e all the applications traditionally associated with workflow management This book concentrates on the core technology of software processes its principles and concepts as well as the technical aspect of software process support The contributions to this book are the collective work of the Promoter 2 European Working Group This grouping of 13 academic and 3 industrial partners is the successor of Promoter a working group responsible for creating a European software process community Promoter 2 aims at exploiting this emerging community to collectively develop remaining open issues to coordinate activities and to assist in the dissemination of results The title *Software Process Modelling and Technology* Fink94 was produced during Promoter 1 Being project based it presented the main findings and proposals of the different projects then being undertaken by the partners

**Database Systems For Advanced Applications '91 - Proceedings Of The 2nd International Symposium On Database Systems For Advanced Applications** Akifumi Makinouchi, 1992-09-21 This book provides an authoritative overview of the global development of surgical paediatrics Biographical accounts of key people who developed this relatively new specialty many of whom are now household names are presented The compendium also acknowledges the enormous contribution of imaging ultrasound MRI and PET scans minimal invasive surgery and fetal surgery as well as the role of related journals and associations in the progress of surgical paediatrics Many of the contributors have been instrumental to the development of surgical paediatrics in their respective countries and have considerable worldwide influence on the management of children requiring surgical care Through their valuable insight and first hand experience this book not only shines a light on the past achievements of previous generations of paediatric surgeons but also serves as a model to encourage future generations to do likewise

**Software Engineering Environments** Keith H. Bennett, 1989 **Enterprise Information Systems** Joaquim Filipe, 2013-11-11 This book includes a set of selected papers from the first International Conference on Enterprise Information Systems ICEIS 99 held in Se tbal

Portugal from 27 to 30 March 1999 ICEIS focuses on real world applications and aims at becoming a major point of contact between research scientists engineers and practitioners in the area of business applications of information systems This year four simultaneous tracks were held covering different aspects related to enterprise computing including Systems Analysis and Specification Database Technology and its Applications Artificial Intelligence and Decision Support Systems and Internet and Intranet Computing Although ICEIS 99 received more than 200 submissions only 96 papers were accepted for oral presentation and only 24 were selected for inclusion in this book These numbers demonstrate stringent quality criteria and the intention of maintaining a high quality forum for future editions of this conference A number of additional keynote lectures case studies and technical tutorials were also held These presentations by specialists in different knowledge areas made an important contribution to increase the overall quality of the Conference and are partially expressed in the first two papers of the book

Advances in Computers Marvin Zelkowitz, 2009-06-12 This is volume 73 of Advances in Computers This series which began publication in 1960 is the oldest continuously published anthology that chronicles the ever changing information technology field In these volumes we publish from 5 to 7 chapters three times per year that cover the latest changes to the design development use and implications of computer technology on society today In this current volume subtitled Emerging Technologies we discuss several new advances in computer software generation as well as describe new applications of those computers The first chapter gives an overview of various software development technologies that have been applied during the past 40 years with the goal of improving the software development process This includes various methods such as structured development methods reviews object oriented methods and rapid development technologies Chapter 2 explores implications of UML as an emerging design notation for software Chapter 3 looks at the emerging concept of pervasive computing and its impact on resource management and security The authors discuss how the goal of transparency of computers affects efficiency of the system as well as security concerns Chapter 4 discusses RFID or radio frequency identification This is the technology that cheaply tags products with unique identifiers that only need to pass near a reading device rather than specifically being read by a scanner With this technology products can be traced through the supply chain from manufacture to use easily In the final chapter the authors discuss the use of robot technology in medicine specifically computer integrated interventional medicine CIIM in which robotic control takes over some or all of the aspects of surgery

*Fundamental Approaches to Software Engineering* Maura Cerioli, 2005-03-01 ETAPS 2005 was the eighth instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprised seven conferences CC ESOP FASE FOSSACS TACAS 17 satellite workshops AVIS BYTECODE CEES CLASE CMSB COCV FAC FESCA FINCO GCW DSE GLPL LDTA QAPL SC SLAP TGC UITP seven invited lectures not including those that were specific to the satellite events and several tutorials We received over 550 submissions to the seven conferences this year giving acceptance rates below 30% for each one Congratulations to all the authors who made it to the final program I hope that most of the other authors still found a way of participating in this exciting event and I hope you will continue submitting The events that comprise ETAPS address various aspects of the system development process including specification design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on the one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive

Proceedings of the 8th International Workshop on Software Specification and Design ,1996 **Requirements for a Software Engineering Environment** Marvin V. Zelkowitz, 1989 This is a compilation of papers submitted by participants of a workshop organized to consider the requirements for a software engineering environment a programming environment that aids the professional programmer in completion of the tasks necessary to build and maintain large complex software systems The goal of the workshop was to consider the requirement for such an environment by examining the contributions that could be made by recent advances in technology in a variety of computer science areas including methodology system architecture measurement and evaluation artificial intelligence verification databases human interfaces and programming languages

Garg, Mehdi Jazayeri, 1996 Process Centered Software Engineering Environments PSEEs represent a new generation of software engineering environments in which the processes used to produce and maintain software products are explicitly modeled in the environment PSEEs hold the exciting promise of enabling a significant increase in both software productivity and quality The book presents a comprehensive picture of this emerging technology while highlighting the key concepts and issues The first chapter introduces some of the basic concepts and developments behind PSEEs and discusses the unifying role it plays in combining project management software engineering and process engineering The second

chapter reviews related process modeling and representation concepts terminology and issues Chapter 3 analyzes the features of some example PSEEs and Chapter 4 takes an inside look at the implementation of these features by describing specific design choices made by researchers The last chapter discusses the evolution of PSEEs to accommodate practical issues in actual work settings and to play a more significant role in the software life cycle The text is a collection of influential papers that will bring the newcomer quickly up to speed on this fast moving field For the researcher the issues described in the text present a challenge to be conquered and directions to pursue For the practitioner they represent benefits that may be gained in the application of PSEEs in the work environment
