

The Flowering

David Thomson

The Flowering:

The Flowering Process Frank B. Salisbury, 2013-10-22 The Flowering Process covers the physiological processes involved in the conversion from the vegetative to the reproductive state in higher plants This book is composed of ten chapters and begins with a description of the biological framework of flowering The succeeding chapters deal with the link between ecology and the flowering process and the low temperature promotion of flowering These topics are followed by discussions on methods of experimentation with cocklebur and the preparation of plant for response to photo period Other chapters describe the effect of light pigment and timing on flowering process The final chapters consider the synthesis movement and action of the flowering hormone This book will prove useful to graduate students with subjects related to the mechanisms of flowering

The Flowering of Australia's Rainforests Geoff Williams, 2021-05-03 The Flowering of Australia's Rainforests provides a comprehensive introduction to the pollination ecology evolution and conservation of Australian rainforest plants with particular emphasis on subtropical rainforests and their associated pollinators This significantly expanded second edition includes new information on the impact of climate change fire fragmentation and invasive species Rainforests continue to be a focus of global conservation concern not only from threats to biodiversity in general but to pollinators specifically Within Australia this has been emphasised by recent cataclysmic fire impacts ongoing extreme drought events and the wider consideration of climate change This second edition strengthens coverage of these issues beyond that of the first edition The Flowering of Australia's Rainforests makes timely contributions to our understanding of the nature and function of the world's pollinator fauna plant reproduction dependencies and the evolutionary pathway that has brought them to their current state and function Illustrated with 150 colour plates of major species and rainforest formations this reference work will be of value to ecologists and field naturalists botanists conservation biologists ecosystem managers and community groups involved in habitat restoration
