The Process Of Intuition Quest:

The Process of Intuition Virginia Burden, Virginia Burden Tower, 1975 *The Process of Intuition* Virginia Burden Tower, 1987 **Quests Old and New** George Robert Stow Mead, 1913 *Meaning* Michael Polanyi, Harry Prosch, 1975

Published very shortly before his death in February 1976 Meaning is the culmination of Michael Polanyi's philosophic endeavors With the assistance of Harry Prosch Polanyi goes beyond his earlier critique of scientific objectivity to investigate meaning as founded upon the imaginative and creative faculties Establishing that science is an inherently normative form of knowledge and that society gives meaning to science instead of being given the truth by science Polanyi contends here that the foundation of meaning is the creative imagination Largely through metaphorical expression in poetry art myth and religion the imagination is used to synthesize the otherwise chaotic and disparate elements of life To Polanyi these integrations stand with those of science as equally valid modes of knowledge He hopes this view of the foundation of meaning will restore validity to the traditional ideas that were undercut by modern science Polanyi also outlines the general conditions of a free society that encourage varied approaches to truth and includes an illuminating discussion of how to restore to modern minds the possibility for the acceptance of religion Intervention Set Selection Simone G. Symonette, 2022-09-07

This book explains the process of intervention set selection and provides guidance for anyone seeking to improve performance The 15 principles generated serve as a guide professionals can use to select an intervention set The principles explain how and why certain actions happen during the intervention set selection phase and they function as a guide for practitioners when selecting intervention sets A schemata that consists of composition directional dependence mechanism of action enforcement transformation and reverberation adds to the field of performance improvement Identifying these factors explains a practitioner's behaviors when selecting an intervention set The schemata also illustrate the art and science inherent in intervention set selection The value of a set is to create the most comprehensive intervention to assure successful human performance The book concludes by encouraging others to continue the journey **The Romantic and Transcendental Quests of Ralph Waldo Emerson and Victor-Marie Hugo** Regina Moeller Young, 2003 This study demonstrates that there is a substantial philosophical congeniality between Ralph Waldo Emerson and Victor Hugo which has so far gone unnoticed It shows many striking affinities offering a fresh perspective on both authors It examines how both Emerson's and Hugo's ideas and perceptions grew out of 19th century Western ideology as well as their personal psycho-physiological experiences of the world In arguing for an understanding of Hugo as a Gallic Transcendentalist this comparative study corrects one popular image of the French writer that of a moody eccentric megalomaniac and superficial trifler as well as socio-historical backgrounds it examines specific authentic 19th century articles from French and American journals in order to shed light on what critics had to say about the foreign poet There is also a collection and analysis of Emerson's never written French traits Emerson's perceptions of the French as a nation as expressed in his journal entries

The study then gives a detailed analysis of Emerson's and Hugo's main affinity their Transcendentalist cosmology The Religious Quests of the Graeco-Roman World Samuel Angus,1929 *The Cult of the Passing Moment* Arthur Chandler,1915

The Theosophist Henry Steel Olcott,Annie Besant,George Sydney Arundale,1988 **Michael Polanyi** Mark T. Mitchell,2023-10-10 The polymath Michael Polanyi first made his mark as a physical chemist but his interests gradually shifted to economics politics and philosophy in which field he would ultimately propose a revolutionary theory of knowledge that grew out of his firsthand experience with both the scientific method and political totalitarianism In this sixth entry in ISI Books Library of Modern Thinkers series Mark T Mitchell reveals how Polanyi came to recognize that the roots of the modern political and spiritual crisis lay in an errant conception of knowledge that served to foreclose any possibility of making meaningful statements about truth goodness or beauty Polanyi's theory of knowledge as ineluctably personal but also grounded in reality is not merely of historical interest writes Mitchell for it proposes an attractive alternative for anyone who would reject both the hubris of modern rationalism and the ultimately nihilistic implications of academic postmodernism

Psychology Today, June 1975 ,1975 Summaries of Theses Accepted in Partial Fulfillment of the Requirements for the Degree of Doctor of Philosophy Harvard University. Graduate School of Arts and Sciences,1937 The Quest ,1995

The Publishers Weekly ,1975 *The Limits of Liberalism* Mark T. Mitchell,2018-11-30 In *The Limits of Liberalism* Mark T Mitchell argues that a rejection of tradition is both philosophically incoherent and politically harmful *The Limits of Liberalism* identifies why most modern thinkers have denied the essential role of tradition and explains how tradition can be restored to its proper place Mitchell demonstrates that the rejection of tradition as an epistemic necessity has produced a false conception of the human person the liberal self which in turn has produced a false conception of freedom Together these false conceptions have facilitated both liberal cosmopolitanism and identity politics Mitchell uses the philosophies of Michael Oakeshott Alasdair MacIntyre and Michael Polanyi to construct a compelling argument for a reconstructed view of tradition and as a result a reconstructed view of freedom *The Limits of Liberalism* reveals that only by finding an alternative to the liberal self can we escape the incoherencies and pathologies inherent therein **Twenty-six Additional Scientific**

Papers and Philosophical Essays That Will Eventually Compel Scholars to Rethink the World Daniel Zanou,2024-01-08 This compilation of twenty six scientific papers and philosophical essays expands the mind body problem of the French philosopher and mathematician Ren Descartes We expose the nature of consciousness we discuss its origin and manifestations in living organisms We distinguish it from life and elaborate on human existence on Earth From there we solve the ancient enigma posited by Epicurus the Greek philosopher In science we take over Schrodinger's works on the body's entropy and use the research of the Japanese Nobel laureate Yoshinori Ohsumi to explain how non living atoms transition to living molecules Francis Crick's faded dream that becomes reality We delve into the living organisms to explain various losses of consciousness and awareness including sleep syncope and death We mainly focus on sleep to elucidate this mystery

that no living organisms escape *Hebrew Union College Monthly* ,1927 The Secret of Happiness Edmond Holmes,1919
 The American Ecclesiastical Review Herman Joseph Heuser,1945 The Arthurian Quest Amber Wolfe,2002-09 An
examination of the legend of Camelot which draws on mythological cultural historical and psychological information to reveal
how Arthurian myth can be used for personal transformation
