Searing, 1882 Outlines of an Historical View of the Progress of the Human Mind Jean-Antoine-Nicolas de Caritat marquis de Condorcet, 1795 *The Mirage of Dignity on the Highways of Human 'Progress'* Lukman Harees, 2012-01-16 The Modern Man is hypocritically boasting of unprecedented material progress in a world where inter alia millions daily go to bed hungry die or get killed through unwanted wars and preventable causes live in inhumane conditions vulnerable being exploited with ever widening inequality and might still ruling over right in international relations even in the post UDHR era an indictment on the collective conscience of mankind Besides the flame of materialism has been devouring time tested moral values causing chaos within the basic unit in society the family and relegating Man and his dignity to the level of animals and even manipulating his identity Therefore questions arise Is Moral law fading are political economic systems and institutions like UN failing in realizing the lofty goal of affording due dignity basic rights and social justice humanity deserves Can the bystanders be mere onlookers anymore This book seeks to dispassionately survey the yawning gap between the rhetoric and the ground reality in bringing about dignity and social justice for humanity from bystanders perspective in the light of these questions and underlines the imperative need for moral progress to go hand in hand to make Man assume his due role as the trustee on earth It also exhorts bystanders to close ranks as human dignity champions rights defenders identity protectors against onslaughts from power hungry politicians mighty powers and vested interests This is the need of the times and what our future progeny demands *The Story of Human Progress* Frank Wilson

Blackmar,1896 **Outlines of an Historical View of the Progress of the Human Mind** Antoine-Nicholas Condorcet,2009-04-01 Perhaps the last great work of the Enlightenment this landmark in intellectual history is the Marquis de Condorcet s homage to the human future emancipated from its chains and led by the progress of reason and the establishment of liberty Writing in 1794 while in hiding under sentence of death from the Jacobins in revolutionary France Condorcet surveys human history and speculates upon its future With William Godwin he is the chief foil of Malthus s Essay on Population Portrayed by Malthus as an elate and giddy optimist Condorcet foresees a future of indefinite progress Freed from ignorance and superstition he argues that the human race stands on the threshold of epochal progress and limitless improvement Condorcet defies modernist stereotypes of the right and the left He is at once precursor of the free market and social democracy This new edition of the original 1795 English translation is the only English translation of a work of Condorcet currently in print **Records of Progress** ,1929 Re-Purposing Universities for Sustainable Human Progress Iain Stewart,Victoria Hurth,Stephen Sterling,2022-03-31 The Human Relationship to Nature Matthew R. Foster,2016-11-02 Growing alarm over the harm done by humans to the natural world and even to the viability of our own industrial civilization compels us to ask the deeper moral question What should be the human relationship to nature Matthew R Foster starts by assessing three contrasting patterns of moral reasoning the Progress Ethic that created the world we live in the biblically inspired Stewardship Ethic and the Connection Ethic based on scientific understanding of the interdependence of all natural entities Critical analysis reveals that none of these ethics is able to sustain the values it advocates due to two unsupportable presumptions that the norms of human morality are commensurate with the natural world and that the value of an entity is an intrinsic property Foster argues that in order for a future environmental ethic to be both logically coherent and environmentally constructive it must start from unconventional notions First because nature will never be commensurate with human moral reasoning non rational resources must be employed despite the risks involved Second value resides in the relationship of one entity to another and does not belong intrinsically to either in short value is foremost a verb rather than a noun Foster proposes a new paradigm attentive to the realm of value relations among all natural entities one which offers mediating opportunities between nature and morality In this new ethic there are no shoulds Rather moral responsibilities to the natural entities around us are elective placing us in an unfamiliar yet potentially liberating network of relationships This book will be of interest to scholars both instructors and students of environmental ethics philosophy religion and intellectual history and all who are concerned about the environmental challenges of our time
