The Science of Power Benjamin Kidd, 2015-06-16 Excerpt from The Science of Power At some future time the nature of the drama which is at present unfolding itself in history must make a powerful appeal to the human imagination Under our eyes with the confused details of the events of the leading countries of the earth we see the curtain rising upon an entirely new order of the world It is one of the curious features of our day that the nature of the change is as yet scarcely apprehended The shadow of it rests upon all the events of the time The meaning of it encircles the world The instinct of it moves in the minds of distant peoples and of strange races But there is yet scarcely any conception of its nature We are undoubtedly living in the West in the opening stages of a revolution the like of which has never been

The Science of State Power in the Habsburg Monarchy, 1790-1880
Borbala Zsuzsanna Török, 2024-06-01
The formation of modern European states during the long 19th century was a complicated process challenged by the integration of widely different territories and populations. *The Science of State Power in the Habsburg Monarchy 1790-1880* builds on recent research to investigate the history of statistics as an overlooked part of the sciences of the state in Habsburg legal education as well as within the broader public sphere. By exploring the practices and social spaces of statistics, author Borbala Zsuzsanna Török uncovers its central role in imagining the composite Habsburg Monarchy as a modern and unified administrative space.

The Science of Power (Classic Reprint) Benjamin Kidd, 2017-09-15
Excerpt from *The Science of Power*: It is this fighting pagan of the world who has made the history of the West. The civilization which he has produced is the strangest power in the fields of time. He has introduced into it at every point the spirit of the unmeasured ages of conquest out of which it has come. Into all the institutions which he has created he has carried the spirit of war and the belief in force as the ultimate principle of the world.
