Atwater, 2013-01-01 There are many different paths to the future According to P M H Atwater one of the foremost investigators into near death experiences future memory allows people to live life in advance and remember the experience in detail when something triggers that memory Atwater explains the unifying and permanent effect of that experience is a brain a brain shift which she believes may be at the very core of existence itself In *Future Memory* Atwater shows that structural and chemical changes are occurring in our brains changes indicative of higher evolutionary development This mind blowing exploration of a mind blowing topic traces her findings about this phenomenon and explores its implications for the individual and for society
