International Science Between the World Wars Nikolai Krementsov, 2004-08-02 What is international science and how does it function This book answers these questions through a detailed study of international congresses on genetics held from 1899 to 1939 It presents a portrait of international science as a product of continuous interactions that involved scientists and their patrons within specific political ideological and disciplinary contexts Drawing on a variety of archival sources ranging from Stalin's personal papers to the records of the Gestapo and from the correspondence among scientists in different countries to the minutes of the Soviet government's top secret meetings it depicts the operations of international science at a time of great political tensions Krementsov breaks with the view of science as either inherently national or quintessentially international examining instead the intersection between national and international agendas in scientists activities Focusing on the dramatic history of the Seventh international genetics congress he investigates contradictions inherent to scientists dual loyalties to their country and their science

Through analysis of negotiations among three groups of actors involved with the organization of the congress Krementsov examines the role of ideologies patronage and personal networks in the operations of international science **The First**

World War Hew Strachan, 2003-02-06 This is the first truly definitive history of the First World War the war that has done most to shape the twentieth century The first generation of its historians had access to only a limited range of sources and their focus was primarily on military events More recent approaches have embraced cultural diplomatic economic and social history In Hew Strachan's authoritative and readable history these fresh perspectives are incorporated with the military and strategic narrative The result is an account that breaks the bounds of national preoccupations to become both global and

comparative To Arms the first of three volumes in this magisterial study examines not only the causes of the war and its opening clashes on land and sea but also the ideas that underpinned it and the motivations of the people who supported it It provides full and pioneering accounts of the war s finances of the war in Africa and of the Central Powers bid to widen the war outside Europe **World War II in Global Perspective, 1931-1953** Andrew N. Buchanan,2019-05-07 A comprehensive review of World War II that offers a global level analysis Written for academics and students of history World War II in Global Perspective 1931 1953 presents a dynamic and global account of the historical events prior to during and after World War II The author a noted expert on the topic explores the main theaters of the war and discusses the connections between them He also examines the impact of the war on areas of the world that are often neglected in historical accounts including Latin America sub Saharan Africa and the so called neutral countries This comprehensive text clearly shows how in the struggle against the Axis powers the United States replaced Britain as the global superpower The author discusses the Japanese invasion of Manchuria in 1931 and the Korean War 1950 1953 and argues that the core years of the war 1939 1945 cannot be understood without considering the turbulent events that framed them The text puts World War II in context as a series of large regional conflicts that intersected and overlapped finally emerging as a genuine world war with the formal entry of the United States in late 1941 This vital text Offers a comprehensive review of World War II that frames it in a global context Gives weight to the economic and political developments of the war Provides a robust account of the main military campaigns Contains illustrations and maps that themselves highlight little known aspects of the global war
