Trouble With Science:

The Problem with Science R. Barker Bausell, 2021 Recent events have vividly underscored the societal importance of science yet the majority of the public are unaware that a large proportion of published scientific results are simply wrong The Problem with Science explains in nontechnical language how such fallacy occurs how it gets published in respected scientific journals and how it can largely be avoided

The Trouble with Science Robin Dunbar, 1995 Examining the widespread sense of the difficulty of science this work considers why many people find it so hard to grasp how science works why there is so much suspicion of its success and why many still seek refuge in religion or New Age spirituality The author draws on anthropological and psychological material as well as physics astronomy and chemistry and provides a wealth of detail and scientific information

Trouble with Science Ian Graham, Kathryn Senior, Brian Williams, David Salariya, 2012-08-01 An innovative informative and amusing introduction to scientific and technological subjects featuring fascinating and bizarre facts supported by simple explanations and diagrams

The Trouble with Science Robin Dunbar, 2011-04-07 The trouble with science began in 1632 when Galileo demolished the belief that the earth is the centre of the universe Yet despite the bewildering success of the scientific revolution many continue to hanker after the cosy certainties of a man centred universe and young people increasingly turn away from science In The Trouble with Science Professor Robin Dunbar launches a vigorous counter blast Drawing on studies of traditional societies and animal behaviour his argument ranges from Charles Darwin to Nigerian Fulani herdsman from lab rats to the mathematicians of ancient Babylonia Along the way he asks whether science really is unique to western culture even to mankind and suggests that our trouble with science may lie in the fact that evolution has left our minds better able to cope with day to day social interaction than with the complexities of the external world

The Christian Science Journal , 1917

Seeking Science-Friendly Christianity Harwood Hoover, 2023-11-17 This book brings together lessons from three journeys The first journey began with my acceptance of Jesus at a young age together with my growing recognition of the differences between the scriptural record and scientific understanding It continued with a young man's adventure a retreat into nature and an encounter with war War and life's darker side convinced me that even as nature brings awe and opens us to religious experience we need morality The second journey began as I inquired into the ministry When the church transferred the guide they had assigned to me Bob Wessman became my mentor Bob was an ordained pastor with a doctorate in theology For twenty years we read and discussed theology including the Catholic ideas that I had discovered while teaching with the Dominican Sisters Bob is in hospice care as I write this and my library is full of the books that he gifted to me Thank you Bob I now had many ideas from my first two journeys but they floated about in my head without an organizing form The challenge was to find a form that would allow the ideas to come together and speak in harmony Differences between Scripture and science had troubled me since my youth and I could not ignore science It was simply too good at finding truth to ignore So science would have to help me Science

cannot touch all that religion touches but science and technology can be in correspondence with theology Researching and writing this book could explore that relationship The result was to have remained personal but then I thought that a reader might find an idea or two useful A person who is literate in science might see why trusting Jesus is both good and reasonable This book is the story of the third journey an odyssey through science and Christian theology

Leon E. Trachtman,Robert Perrucci,2000-07-26 The combative metaphor of Oscience warsO has taken on a predominant position within the collective conscious from being featured on the programs of scientific meetings to being splashed across the pages of leading national magazines and newspapers Some in the scientific community perceive their profession to be under siege by members of the academic left radical environmentalists religious fundamentalists eco feminists and others This book based on in depth interviews with sixty members of groups with alleged Oanti scienceO attitudes examines how pervasive and uniform these critiques are The research is designed to examine two conflicting hypotheses 1 that anti science attitudes reflect a general cynicism about all major social institutions and 2 that anti science views are not broadly based but are reflective instead of the particular interests of a given social grouping In the final analysis Perrucci and Trachtman dig at the root of the so called Oscience warsO by presenting evidence that the wars are not the product of an overarching suspicion of the institutions at the core of our society but are instead the product of organized interest groups which shape the attitudes and beliefs of their respective members *Christian Science and Legislation* ,1906
