Warren,James M. Reeve,Philip E. Fess,2002 The 8th edition of this text provides a foundation of accounting concepts with features to show how users can use accounting to understand business In the text the authors refine their approach to accounting s expanding role in business *Media Now* Joseph D. Straubhaar,Joseph Straubhaar,Robert LaRose,2000 The book addresses the main media channels in society their interdependence in light of emergent technologies foundation theories and traditional concepts This book has been revised to offer increased coverage of culture and media and the political economies of media **Psychology** James S. Nairne,2000 James Nairne s highly respected and accessible new edition offers all the content pedagogy and visual appeal that professors

and students have come to expect from a successful introductory psychology text and more Nairne's Second Edition offers a cohesive look at how psychology works in our everyday lives. This practical, motivating text presents all the topics you cover in your introductory course but connects them in a way that adds meaning and consistency to your students' study of the discipline. And how does it do this? By introducing students to the adaptive mind, a theme based on the realization that our thoughts and actions stem from our need to adapt to our surroundings. This unique framework stresses practical applications and helps students understand how we use psychology to deal with everyday challenges. Nairne builds all topics around an adaptive problem-solving framework. He emphasizes the way that particular behaviors, thought processes, and emotions help people solve problems, from memorizing a telephone number to ducking under cover as a building begins to shake to producing a quick physical response in the face of traffic hazards. This organizational framework also promotes a common theme of understanding across the chapters. This innovative approach may differ from the presentation you have come to expect from other texts. But beneath the innovation, you'll find ample coverage of all the traditional topics around which you build your course.

Microsoft Office 2000 Introductory Course William Robert Pasewark, 2000 **Western Civilization**
Jackson J. Spielvogel, 1999. There are many reasons why this is the number one selling Western Civilization text in the country. The clear, single author narrative by Jackson Spielvogel presents history in an appealing and accessible manner. This text truly tells a story that students will understand. WESTERN CIVILIZATION strikes a true balance and provides a synthesis of political, economic, social, religious, military, cultural, and intellectual history. This balance gives students a solid foundation for further study in history. The book's documents and maps are useful and superb. **The Software Encyclopedia**, 1988
