Computational Intelligence and Industrial Applications Bin Xin, Hongbin Ma, Jinhua She, Weihua Cao, 2025-04-12 This two volume set CCIS 2465 2466 constitutes of the proceedings of 11th International Symposium on Computational Intelligence and Industrial Applications ISCIIA 2024 held in Beijing China during November 1 5 2024 The 55 full papers and 5 short papers included in this volume were carefully reviewed and selected from 135 submissions The topics cover the following fields connected to computational intelligence and intelligent informatics intelligent information processing pattern recognition and computer vision intelligent optimization and decision making advanced control multi agent systems robotics and various applications of computational intelligence methods such as neural networks fuzzy reasoning evolutionary computing machine learning and deep learning

MODERN CONTROL ENGINEERING D. ROY

CHOUDHURY, 2005-01-01 This book represents an attempt to organize and unify the diverse methods of analysis of feedback control systems and presents the fundamentals explicitly and clearly The scope of the text is such that it can be used for a two semester course in control systems at the level of undergraduate students in any of the various branches of engineering electrical aeronautical mechanical and chemical Emphasis is on the development of basic theory The text is easy to follow and contains many examples to reinforce the understanding of the theory Several software programs have been developed in MATLAB platform for better understanding of design of control systems Many varied problems are included at the end of each chapter The basic principles and fundamental concepts of feedback control systems using the conventional frequency domain and time domain approaches are presented in a clearly accessible form in the first portion chapters 1 through 10 The later portion chapters 11 through 14 provides a thorough understanding of concepts such as state space controllability and observability Students are also acquainted with the techniques available for analysing discrete data and nonlinear systems The hallmark feature of this text is that it helps the reader gain a sound understanding of both modern and classical topics in control engineering

Advanced Electromagnetic Computation Dikshitulu K. Kalluri, 2017-11-28 Advanced

Electromagnetic Computation with MATLAB discusses commercial electromagnetic software widely used in the industry Algorithms of Finite Differences Moment method Finite Element method and Finite Difference Time Domain method are illustrated Hand computed simple examples and MATLAB coded examples are used to explain the concepts behind the algorithms Case studies of practical examples from transmission lines waveguides and electrostatic problems are given so students are able to develop the code and solve the problems Two new chapters including advanced methods based on perturbation techniques and three dimensional finite element examples from radiation scattering are included Scientific and Technical Aerospace Reports ,1995 **IEEE Transactions on Circuits and Systems** ,2005 **Rewriting Techniques and Applications** ,1999 **Boundary Element Methods in Engineering** C.
