## **The Gambit:**

**The Hexagon Story** Frederic C. E. Oder,2012 The United States developed the Gambit and Hexagon programs to improve the nation s means for peering over the iron curtain that separated western democracies from east European and Asian communist countries The inability to gain insight into vast denied areas required exceptional systems to understand threats posed by US adversaries Corona was the first imagery satellite system to help see into those areas Hexagon began as a Central Intelligence Agency CIA program with the first concepts proposed in 1964 The CIA s primary goal was to develop an imagery system with Corona like ability to image wide swaths of the earth but with resolution equivalent to Gambit Such a system would afford the United States even greater advantages monitoring the arms race that had developed with the nation s adversaries The system that became Hexagon faced three major challenges The first was development of the technology which was eventually overcome by the Itek and Perkin Elmer Corporations The second was bureaucratic deciding how the CIA and Air Force would cooperate in building such a system because they each had strengths and weaknesses in the development of national reconnaissance systems The third challenge was to secure the resources that were required to build the most complicated and largest reconnaissance satellites at the time By 1971 the NRO overcame the challenges to successfully launch the Hexagon satellite and fulfill or even exceed expectations for unparalleled insight into capabilities of US adversaries

[A History of the Hexagon Program](#) Richard J. Chester,2012 In late 1965 the stage was being set for the final study of a new generation photographic satellite It would be required to provide the resolution of earlier close look satellites while simultaneously providing the broad area coverage capability of previous search surveillance systems On July 21 1966 proposals for the Hexagon sensor were submitted to the government by both Itek and the Perkin Elmer Corporation At 1700 on October 10 Mr Robert Sorensen then Senior Vice President Optical Group received an important phone call from Mr John J Crowley Director of Special Projects CIA Perkin Elmer s proposal was accepted by the government This is a story of the events that followed from Introduction
