

EDITING BUSINESS CARDS

- Opening an individual contact record in a view other than People view displays an automatically downloaded business card that includes the image associated with the contact record. You can:
 - Modify the content, layout, colors, fonts, and labels of the business card associated with any contact record.
 - Send electronic business cards as email message attachments or display them as your email signature.

Call a business card

- From a view of the People results other than People view, open the contact record for editing.
- Go to the Action group on the Contact tab.
- Click **Business Card**.

- Go to the Card Storage area in the Contact list, then:
 - To control the location of the contact image on the business card: Click **Image Left**, **Image Right**, **Image Top**, or **Image Bottom**.
 - To hide the image: Click **None**.
- Click **Background Color**. Then, click the card background color you want **OK**.
- To replace the background color with the image:
 - In the Contact list, click **Background Image**.
 - In the Image Address, specify the percentage of the card the image should cover.
 - In the Image Align list, click the position of the image on the business card.
 - All options other than **Fill** or **None** show the image on the card.
- In the Contact area, use the buttons below the page to add, remove, and reorder labels, ending with the **Labels** you want to display on the business card as they will be seen by People view.
- In the Card settings, change the type, label, or formatting associated with the card.
- When the business card looks the way you want, click **OK**.

EMPTYING THE TRASH

- Messages, calendar items, contact records, tasks, and notes that you delete from the Outlook results are sent to the Deleted Items folder of the account you delete them from.
 - Revoke:** You can restore information if you accidentally delete it.
 - Recover:** Deleted items cannot restore your data storage limits.
- To keep your Outlook synchronization safe, have Outlook empty the Deleted Items folder each time you click **OK**.
- IM:** If you need to restore an item that you deleted from a Microsoft Exchange account after emptying the Deleted Items folder, your Exchange administrator might be able to recover it during the retention retention period.
- Empty an individual Deleted Items folder:**
 - Right-click the folder.
 - Click **Empty Folder**.
- Automatically purge all deleted items:**
 - Display the Addressed page of the Outlook Options dialog box.
 - Go to the Outlook section of the section of the page.
 - Check the box for **Empty Deleted Items folders** when using Outlook.

ACCESSING ORGANIZATIONAL CONTACT INFORMATION

For each Microsoft Exchange account that you set up as Outlook, you have access not only to your Outlook address book and any secondary address books that you create, but also to a **Global Address List (GAL)** that contains the contact information for members of your organization.

Note: You can't display the contents of the GAL in the People results as you can with regular address books.

Access contact information from the GAL

- Display any results of the search that the GAL is associated to.
- In the **Find** group on the Home tab:
 - Click the **Address Book** button.
 - If the Address Book dialog box doesn't display your organization's Global Address List, choose **Global Address List** in the Address Book list.

- To scroll the GAL to the first instance of a name: Enter all or part of the first or last name in the Search box.
- To filter the GAL to display only records containing the search string: Select **More** below.
- Enter any part of the name, title, phone number, location, department, or email address of the contact record you want to locate in the Search box.
- Click **Go**.

GETTING HELP

Find additional information about Outlook features, get help creating a calendar, and discover options to your Outlook problems.

- Click the Search area field located to the right of the Address tab.
- Enter a topic in the text field or display a list of related commands.
- Run any command directly from the search results.
- IM:**
 - Click **Get Help on "Topic"** before the search results to open the related Help file on the topic **IM**.
 - Click **Search Outlook on "Topic"** before the search results to open the Search Outlook pane.
 - Smart Lookup offers new topics: **Explore and Update**.
 - Explore view:** Displays search results from Wikipedia, Bing, and other websites **Related items:** Displays the definition of the topic or a list of other results on the related **Workspaces**.
 - Included as a web recording of the entire conversation of the search area, if one is available.
- Only display search results from one source in Explore view:**
 - Open the Smart Lookup pane. Then, click the **Explore** heading.
 - Click **More** below the top search results in the category you want to view.

Muller, 1999-03-08 Craft the Right Design Using UML. Whether building a relational, object relational, or object oriented database, database developers are increasingly relying on an object oriented design approach as the best way to meet user needs and performance criteria. This book teaches you how to use the Unified Modeling Language, the official standard of the Object Management Group, to develop and implement the best possible design for your database. Inside the author leads you step by step through the design process from requirements analysis to schema generation. You will learn to express stakeholder needs in UML use cases and actor diagrams, to translate UML entities into database components, and to transform the resulting design into relational, object relational, and object oriented schemas for all major DBMS products. Features: Teaches you everything you need to know to design, build, and test databases using an OO model. Shows you how to use UML, the accepted standard for database design according to OO principles. Explains how to transform your design into a conceptual schema for relational, object relational, and object oriented DBMSs. Offers practical examples of design for Oracle, SQL Server, Sybase, Informix, Object Design, POET, and other database management systems. Focuses heavily on reusing design patterns for maximum productivity and teaches you how to certify completed designs for reuse. Internet Commerce and Software Agents Syed Mahbubur Rahman, Robert J. Bignall, 2001-01-01 The Internet is revolutionizing retail merchandising and shopping. Software agents are capable of automating the more routine, tedious, and time-consuming tasks involved in the trading process. *Internet Commerce and Software Agents: Cases, Technologies, and Opportunities* addresses some major Internet commerce issues and the challenges to be met in achieving automated and secure Internet trading.
