Some Monetary Problems International:

Legislating International Organization Kathryn C. Lavelle, 2011-11-11 In *Legislating International Organization* Kathryn Lavelle argues against the commonly held idea that key international organizations are entities unto themselves immune from the influence and pressures of individual states domestic policies Covering the history of the IMF and World Bank from their origins she shows that domestic political constituencies in advanced industrial states have always been important drivers of international financial institution policy This book will reshape how we think about how the US Congress interacts with international institutions and more broadly about the relationship of domestic politics to global governance throughout the world

From Dependency To Development Heraldo Munoz, 2019-04-09 Although much has been written on the concept nature and implications of dependency in underdeveloped countries there is a noticeable lack of comprehensive material on dependency reversal the ways and circumstances under which dependency and underdevelopment can be overcome Dr Mu oz brings together in a coherent volume the alternative strategies for dependency reversal that have been posed by leading social scientists the emphasis is on commonalities differences and theoretical and practical derivations The book outlines the basic features of the dependency literature and clarifies the emergence and development of the dependency paradigm its meaning and its differences from other theoretical perspectives on underdevelopment New aspects of dependency situations are also introduced Significant alternatives to dependency are offered taking into account varying geographical ideological and functional factors Though no claim is made that all existing answers to development are included this is clearly the most complete work available to date
