Chinese Students' Writing in English Maria Leedham, 2014-08-27 Chinese students are the largest international student group in UK universities today yet little is known about their undergraduate writing and the challenges they face Drawing on the British Academic Written English corpus a large corpus of proficient undergraduate student writing collected in the UK in the early 2000s this study explores Chinese students written assignments in English in a range of university disciplines contrasting these with assignments from British students The study is supplemented by questionnaire and interview datasets with discipline lecturers writing tutors and students and provides a comprehensive picture of the Chinese student writer today Theoretically framed through work within academic literacies and lexical priming the author seeks to explore what we know about Chinese students writing and to extend these findings to undergraduate writing more generally In a globalized educational environment it is important for educators to understand differences in writing styles across the student body and to move from the widespread deficit model of student writing towards a descriptive model which embraces different ways of achieving success Chinese Students Writing in English will be of value to researchers EAP tutors and

in Higher Education Paula Hixenbaugh, 2006 A great deal has changed since the last book on personal tutoring in higher education appeared a decade ago Mass higher education and resource constraints have put pressures on the traditional models of academic support just when increased student numbers and greater diversity has made the need for one to one and small group learning more urgent Personal Tutoring in Higher Education examines the pressures on traditional models of personal tutoring and sets this against the benefits of greater interaction and engagement to support students as they make the transition into higher education and progress through it successfully The contributors offer alternative ways of conceptualising personal tutoring and describe new and effective ways of implementing appropriate support systems at strategic and practical levels And they discuss the implications for training development and support needs of university staff in this changing environment The book is essential reading for all managers and tutors in higher education *FoL*, 2005

Mullin, 2009 Carol Haviland Joan Mullin and their collaborators report on a three year interdisciplinary interview project on the subject of plagiarism authorship and property and how these are conceived across different fields The study investigated seven different academic fields to discover disciplinary conceptions of what types of scholarly production count as owned Less a research report than a conversation the book offers a wide range of ideas and the chapters here will provoke discussion on scholarly practice relating to intellectual property plagiarism and authorship and to how these matters are conveyed to students Although these authors find a good deal of consensus in regard to the ethical issues of plagiarism they document a surprising variety of practice on the subject of what ownership looks like from one discipline to another And they discover that students are not often instructed in the conventions of their major field **Encyclopedia of Language and Education** Nancy H. Hornberger, 2007-11-20 In this

second fully revised edition the 10 volume Encyclopedia of Language and Education offers the newest developments including two new volumes of research and scholarly content essential to the field of language teaching and learning in the age of globalization In the selection of topics and contributors the Encyclopedia reflects the depth of disciplinary knowledge breadth of interdisciplinary perspective and diversity of sociogeographic experience in the field Throughout there is an inclusion of contributions from non English speaking and non western parts of the world providing truly global coverage
