Symposium on Probability Methods in Analysis Jean-Michel Morel, Bernard Teissier, 2006-11-15 **The Cumulative Book Index**, 1978 A world list of books in the English language **Random Walks, Brownian Motion, and Interacting Particle Systems** H. Kesten, R. Durrett, 1991-06-01 This collection of articles is dedicated to Frank Spitzer on the occasion of his 65th birthday The articles written by a group of his friends colleagues former students and coauthors are intended to demonstrate the major influence Frank has had on probability theory for the last 30 years and most likely will have for many years to come Frank has always liked new phenomena clean formulations and elegant proofs He has created or opened up several research areas and it is not surprising that many people are still working out the consequences of his inventions By way of introduction we have reprinted some of Frank's seminal articles so that the reader can easily see for himself the point of origin for much of the research presented here These articles of Frank's deal with properties of Brownian motion fluctuation theory and potential theory for random walks and of course interacting particle systems The last area was started by Frank as part of the general resurgence of treating problems of statistical mechanics with rigorous probabilistic tools
