Committee on Rational Transformations, 1928 **Topics in Algebraic Geometry and Geometric Modeling** Ron Goldman, Rimvydas Krasauskas, 2003 Algebraic geometry and geometric modeling both deal with curves and surfaces generated by polynomial equations Algebraic geometry investigates the theoretical properties of polynomial curves and surfaces geometric modeling uses polynomial piecewise polynomial and rational curves and surfaces to build computer models of mechanical components and assemblies for industrial design and manufacture The NSF sponsored the four day Vilnius Workshop on Algebraic Geometry and Geometric Modeling which brought together some of the top experts in the two research communities to examine a wide range of topics of interest to both fields This volume is an outgrowth of that workshop Included are surveys tutorials and research papers In addition the editors have included a translation of Minding's 1841 paper On the determination of the degree of an equations obtained by elimination which foreshadows the modern application of mixed volumes in algebraic geometry The volume is suitable for mathematicians computer scientists and engineers interested in applications of algebraic geometry to geometric modeling **Topics in Algebra** Stanisław Balcerzyk, 1990 Research Issues in the Learning and Teaching of Algebra Sigrid Wagner, Carolyn Kieran, 2018-12-07 First Published in 1989 We clearly know more today about teaching and learning mathematics than we did twenty years ago and we are beginning to see the effects of this new knowledge at the classroom level In particular we can point to several significant sets of studies based on emerging theoretical frameworks To establish such a framework researchers must be provided with the opportunity to exchange and refine their ideas and viewpoints Conferences held in Georgia and Wisconsin during the seventies serve as examples of the role such meetings can play in providing a vehicle for increased communication synthesis summary and cross disciplinary fertilization among researchers working within a specialized area of mathematical learning This monograph holds selected papers from four more recent conferences on Research Agenda in Mathematics Education *A First Book in Algebra* Fletcher Durell, Elmer Ellsworth Arnold, 1927 Topics in Algebra I. competitions at high school level The level advances with the chapters The topics explored include polynomials functional equations sequences and an elementary treatment of complex numbers The final chapters provide a comprehensive list of problems posed at national and international contests in recent years and solutions to all exercises and problems presented in the book It helps students in preparing for national and international mathematical contests from high school level to more advanced competitions and will also be useful for their first year of mathematical studies at the university It will be of interest to teachers in college and university level and trainers of the mathematical Olympiads
