*Topics in Almost Automorphy* Gaston M. N'Guérékata, 2007-07-10 Since the publication of our first book 80 there has been a real resurgence of interest in the study of almost automorphic functions and their applications 16 17 28 29 30 31 32 40 41 42 46 51 58 74 75 77 78 79 New methods method of invariant spaces uniform spectrum and new concepts almost periodicity and almost automorphy in fuzzy settings have been introduced in the literature The range of applications include at present linear and nonlinear evolution equations integro differential and functional differential equations dynamical systems etc It has become imperative to take a bearing of the main steps of the theory That is the main purpose of this monograph It is intended to inform the reader and pave the road to more research in the field It is not a self contained book In fact 80 remains the basic reference and fundamental source of information on these topics Chapter 1 is an introductory one However it contains also some recent contributions to the theory of almost automorphic functions in abstract spaces VIII Preface Chapter 2 is devoted to the existence of almost automorphic solutions to some linear and nonlinear evolution equations It contains many new results Chapter 3 introduces to almost periodicity in fuzzy settings with applications to differential equations in fuzzy settings It is based on a work by B Bede and S G Gal 40

**Topics on Stability and Periodicity in Abstract Differential Equations** Gaston M. N'Guérékata, 2008 This book presents recent methods of study on the asymptotic behavior of solutions of abstract differential equations such as stability exponential dichotomy periodicity almost periodicity and almost automorphy of solutions The chosen methods are described in a way that is suitable to those who have some experience with ordinary differential equations The book is intended for graduate students and researchers in the related areas

*Leading-edge Research on Evolution Equations* Gaston M. N'Guérékata, 2008 This book presents high quality research from around the world on the theory and methods of linear or nonlinear evolution equations as well as their further applications Equations dealing with the asymptotic behavior of solutions to evolution equations are included The book also covers degenerate parabolic equations abstract differential equations comments on the Schrodinger equation solutions in Banach spaces periodic and quasi periodic solutions concave Lagrangian systems and integral equations

**Semilinear Evolution Equations and Their Applications** Toka Diagana, 2018-10-23 This book which is a continuation of *Almost Automorphic Type and Almost Periodic Type Functions in Abstract Spaces* presents recent trends and developments upon fractional first and second order semilinear difference and differential equations including degenerate ones Various stability uniqueness and existence results are established using various tools from nonlinear functional analysis and operator theory such as semigroup methods Various applications to partial differential equations and the dynamic of populations are amply discussed This self contained volume is primarily intended for advanced undergraduate and graduate students post graduates and researchers but may also be of interest to non mathematicians such as physicists and theoretically oriented engineers It can also be used as a graduate text on evolution equations and difference equations and their applications to

partial differential equations and practical problems arising in population dynamics For completeness detailed preliminary background on Banach and Hilbert spaces operator theory semigroups of operators and almost periodic functions and their spectral theory are included as well *The Golden Anniversary Celebration of the National Association of Mathematicians* Omayra Ortega,Emille Davie Lawrence,Edray Herber Goins,2020-12-10 This volume is put together by the National Association of Mathematicians to commemorate its 50th anniversary The articles in the book are based on lectures presented at several events at the Joint Mathematics Meeting held from January 16 19 2019 in Baltimore Maryland including the Claytor Woodard Lecture as well as the NAM David Harold Blackwell Lecture which was held on August 2 2019 in Cincinnati Ohio

**OAR** ,1967 *Mathematical Reviews* ,2005 Nil Bohr-Sets and Almost Automorphy of Higher Order Wen Huang,Song Shao,Xiangdong Ye,2016-04-26 Two closely related topics higher order Bohr sets and higher order almost automorphy are investigated in this paper Both of them are related to nilsystems In

the first part the problem which can be viewed as the higher order version of an old question concerning Bohr sets is studied for any  $d \in \mathbb{N}$  does the collection of  $n \in \mathbb{Z}^d$  with  $n \in S$  syndetic coincide with that of  $n \in S$  Bohr sets In the second part the notion of  $d$  step almost automorphic systems with  $d \in \mathbb{N}$  is introduced and investigated which is the generalization of the classical almost automorphic ones **Air Force Research Resumés** ,1966 American Book Publishing Record ,2005
