Using Simulation to Solve Problems Tom G. Poole, J. Z. Szymankiewicz, 1977 Assessment of Problem Solving Using Simulations Eva Baker, Jan Dickieson, Wallace Wulfeck, Harold F. O'Neil, 2017-09-25 This volume explores the application of computer simulation technology to measurement issues in education especially as it pertains to problem based learning Whereas most assessments related to problem solving are based on expensive and time consuming measures i e think aloud protocols or performance assessments that require extensive human rater scoring this book relies on computerization of the major portion of the administration scoring and reporting of problem solving assessments It is appropriate for researchers instructors and graduate students in educational assessment educational technology and educational psychology

Theoretical Issues of Using Simulations and Games in Educational Assessment Harold F. O'Neil, Eva L. Baker, Ray S. Perez, Stephen E. Watson, 2021-08-27 Presenting original studies and rich conceptual analyses this volume reports on theoretical issues involved in the use of simulations and games in educational assessment Chapters consider how technologies can be used to effectively assess modify and enhance learning and assessment in education and training By highlighting theoretical issues arising from the use of games and simulations as assessment tools for selection and classification training and evaluation across educational and workplace contexts the volume offers both broad conceptual views on assessment as well as rich descriptions of various context specific applications Through a focus that includes both quantitative and qualitative approaches policy implications meta analysis and constructs the volume highlights commonalities and divergence in theoretical research being conducted in relation to K 12 post secondary and military education and assessment In doing so the collection enhances understanding of how games and simulations can intersect with the science of learning to improve educational outcomes Given its rigorous and multidisciplinary approach this book will prove an indispensable resource for researchers and scholars in the fields of educational assessment and evaluation educational technology military psychology and educational psychology

Learning to Solve Problems David H. Jonassen, 2010-09-13 This book provides a comprehensive up to date look at problem solving research and practice over the last fifteen years The first chapter describes differences in types of problems individual differences among problem solvers as well as the domain and context within which a problem is being solved Part one describes six kinds of problems and the methods required to solve them Part two goes beyond traditional discussions of case design and introduces six different purposes or functions of cases the building blocks of problem solving learning environments It also describes methods for constructing cases to support problem solving Part three introduces a number of cognitive skills required for studying cases and solving problems Finally Part four describes several methods for assessing problem solving Key features includes Teaching Focus The book is not merely a review of research It also provides specific research based advice on how to design problem solving learning environments Illustrative Cases A rich array of cases illustrates how to build problem solving learning environments Part two

introduces six different functions of cases and also describes the parameters of a case Chapter Integration Key theories and concepts are addressed across chapters and links to other chapters are made explicit The idea is to show how different kinds of problems cases skills and assessments are integrated Author expertise A prolific researcher and writer the author has been researching and publishing books and articles on learning to solve problems for the past fifteen years This book is appropriate for advanced courses in instructional design and technology science education applied cognitive psychology thinking and reasoning and educational psychology Instructional designers especially those involved in designing problem based learning as well as curriculum designers who seek new ways of structuring curriculum will find it an invaluable reference tool
