Balcazar, Josep Diaz, Joaquim Gabarro, 2012-12-06 This is the second volume of a two volume collection on Structural Complexity This volume assumes as a prerequisite knowledge about the topics treated in Volume I but the present volume itself is nearly self contained As in Volume I each chapter of this book ends with a section entitled Bibliographical Remarks in which the relevant references for the chapter are briefly commented upon These sections might also be of interest to those wanting an overview of the evolution of the field as well as relevant related results which are not included in the text Each chapter includes a section of exercises The reader is encouraged to spend some time on them Some results presented as exercises are occasionally used later in the text A reference is provided for the most interesting and for the most useful exercises Some exercises are marked with a to indicate that to the best knowledge of the authors the solution has a certain degree of difficulty Many topics from the field of Structural Complexity are not treated in depth or not treated at all The authors bear all responsibility for the choice of topics which has been made based on the interest of the authors on each topic Many friends and colleagues have made suggestions or corrections In particular we would like to express our gratitude to Richard Beigel Ron Book Rafael Casas Jozef Gruska Uwe Schoning Pekka Orponen and Osamu Watanabe

Structural Complexity II Jose L. Balcazar, Josep Diaz, Joaquim Gabarro, 1990-04-25 Structural Complexity I Jose L. Balcazar, Josep Diaz, Joaquim Gabarro, 2012-12-06 In the six years since the first edition of this book was published the field of Structural Complexity has grown quite a bit However we are keeping this volume at the same basic level that it had in the first edition and the only new result incorporated as an appendix is the closure under complementation of nondeterministic space classes which in the previous edition was posed as an open problem This result was already included in our Volume II but we feel that due to the basic nature of the result it belongs to this volume There are of course other important results obtained during these last six years However as they belong to new areas opened in the field they are outside the scope of this fundamental volume Other changes in this second edition are the update of some Bibliographical Remarks and references correction of many mistakes and typos and a renumbering of the definitions and results Experience has shown us that this new numbering is a lot more friendly and several readers have confirmed this opinion For the sake of the reader of Volume II where all references to Volume I follow the old numbering we have included here a table indicating the new number corresponding to each of the old ones

years However as they belong to new areas opened in the field they are outside the scope of this fundamental volume Other changes in this second edition are the update of some Bibliographical Remarks and references correction of many mistakes and typos and a renumbering of the definitions and results Experience has shown us that this new numbering is a lot more friendly and several readers have confirmed this opinion For the sake of the reader of Volume II where all references to Volume I follow the old numbering we have included here a table indicating the new number corresponding to each of the old ones
