

The Harvard Business School Center for Digital Learning has developed this checklist to help you design an effective hybrid workplace model.

The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed to the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for. This includes understanding their work styles, their preferences for work environments, and their needs for flexibility and autonomy.

The way to build a hybrid workplace model that will work for everyone, and address the most common challenges, is to ask the following questions:

1. How do you think about how you want to work? Do you prefer a traditional office environment? Do you prefer a hybrid work environment? Do you prefer a fully remote work environment? Do you prefer a flexible work environment? Do you prefer a work environment that offers the most common challenges?
