Biohackers Magazine, First impressions seem to always get the better of us Quick judgments about others ourselves and our communities never seem to cease making their presence known in our minds Psychologically these initial assumptions and impressions that our mind receives are tactics our mind uses as a means of survival sometimes aligning with our intuition to help us determine what or who is going to be helpful or harmful But we must be careful here Our mind is equipped to handle countless sensations and thoughts and due to this we sometimes get so bogged down by this demanding busy world that we take the easy way out and make a judgment based solely on superficial knowledge without any deeper reflection or analysis The world is fast paced and although our mind does well to keep up it needs to be able to consciously recognize that our health both individual and as human beings is dependent on the strive to understand oneself and the other with empathy and compassion COVID 19 has shed a new spotlight on the increasing mental health crisis that is facing our world and I believe that one of the main causes is careless thinking that leads to quick assumptions to save oneself the time of research and contemplation Don't let others think for you Yes respect those with the authority to offer

professional opinions but don't be a follower be a student and learn from every experience When your health seems to suffer don't assume the worst When someone comes at you the wrong way don't write them off as a heartless soul When you have a tough interaction with someone representing another community don't assume that everyone else is like that Instead look for the best in yourself others and the community There is the power behind the phrase Love thy neighbor When we treat every person that we come across as our neighbor we break down the prideful barriers that ABOUT DALLAS MCCLAIN Born in the USA Dallas is a passionate reader of theological and personal development books He is a devout Catholic Christian and enjoys time outdoors while being a tennis enthusiast He is the Chief Financial Officer and Editor of Biohackers Update Magazine and the co-founder He holds a bachelor's degree in Biological Sciences as well as a TEFL level 5 certificate in teaching English He is currently living in Orlando Florida with his wife daughter and son where he enjoys writing sports and nature hikes in his free time Dallas can best be reached at his email dallas.biohackersupdate.com@gmail.com lead to alienation and instead open the gates to continued togetherness and participation in a loving community I think too often we as biohackers focus more on the physical side of things which is of course important but does not truly define what it means to be human The human person is a compositum of both mind and body Spiritual and Corporeal substance When biohacking ourselves let's remember to start with the intention of acting out of love for thyself of thy neighbor and of thy community There will always be disagreements between people but when we see the other person as our neighbor as another one of us so to speak we offer respect and extinguish any hatred and sinful intentions from the relationship thus creating a peaceful happier and more vibrant environment to foster a healthy mind that's prepared for whatever the onerous world throws at it

The Spark Factor Molly Maloof, 2023-01-31 Foreword by Dave Asprey A breakthrough program for women to revive their lost energy and vitality developed by a leading biohacker and physician Inside of you there is a spark it's what animates you and without it you could not live This energy creation isn't mystical nor is it spiritual it is science We know from research that our cellular machinery transforms the food we eat and the air we breathe into the electricity that fuels us With the right lifestyle inputs we glow with energy but when the demands on our bodies exceed our capacity as is true for so many of us we become burned out mentally and physically Now in The Spark Factor Dr Molly Maloof shares a program uniquely tailored to the biology of women a plan that targets the mitochondria the power source of the cells As Dr Maloof shows the intense all-or-nothing approaches commonly used by biohackers to optimize health including sustained fasting ultra-low carb diets and intense training can be harmful especially for women because they create excessive stress in an already stressed body which can make us tired weak and prone to illness Dr Maloof's innovative program which has been used successfully by

her patients offers lifestyle changes that target the unique biology of women and provide immediate and long term benefits. Instead of denying our bodies we need to listen to what they are telling us. Once we become aware of our physical needs we can give ourselves the resources to become more connected, nourished, safe and strong at both the micro and the macro level. With cutting edge biohacking insights, strategies for personalized nutrition, hormonal health and stress management, *The Spark Factor* is the book women have been waiting for to help them reclaim their vitality and achieve lasting health. **New Scientist**, 2003 *The Ecologist*, 2008 *Head Strong* Dave Asprey, 2017-04-04. From the creator of Bulletproof Coffee and author of the bestselling *The Bulletproof Diet* comes a revolutionary plan to upgrade your brainpower in two weeks or less. For the last decade, Silicon Valley entrepreneur Dave Asprey has worked with world renowned doctors and scientists to uncover the latest, most innovative methods for making humans perform better, a process known as biohacking. In his first book, *The Bulletproof Diet*, he shared his biohacking tips for taking control of your own biology. Now in *Head Strong*, Asprey shows readers how to biohack their way to a sharper, smarter, faster, more resilient brain. Imagine feeling like your mind is operating at its clearest and sharpest and being able, possibly for the first time in your life, to do more in less time. What it suddenly became easier to do the very hardest things you do. Or if you could feel 100% confident about your intellect and never again fear being the person in the room who just isn't smart enough or can't remember something important. How would you treat people if the mood swings, short temper and food cravings that disrupt your day could simply disappear? In *Head Strong*, Asprey shows us that all of this is possible and more. Using his simple lifestyle modifications or hacks to take advantage of how the structure of your brain works, readers will learn how to take their mental performance to the next level. Combining the latest findings in neuroscience and neurobiology with a hacker-inspired get it done now perspective, Asprey offers a program structured around key areas of brain performance that will help you power the brain with exactly what it needs to perform at its best all day long. Eliminate the sources of kryptonite, both nutritional and environmental, that make the brain slower. Supercharge the cellular powerhouses of our brains, the mitochondria, to eliminate cravings and turn up mental focus. Reverse inflammation to perform better right now, then stay sharp and energized well into your golden years. Promote neuron growth to enhance processing speed and reinforce new learning. Hotwiring your brain for success. Asprey's easy to follow two week program offers a detailed plan to supercharge brain performance, including which foods to eat and which ones to avoid, how to incorporate the right kinds of physical activity into your day, a detox protocol for your home and body, meditation and breathing for performance, recommended brain boosting supplements and how to adjust the lighting in your home and work space to give your brain the quality light it thrives on. A better brain and a happier, easier, more productive life is within reach. You just need to get *Head Strong*. **Inventor of the Future** Alec Nevala-Lee, 2022-08-02. One of Esquire's 50 Best Biographies of All Time. One of The Economist's Best Books of 2022. A New York Times Book Review Editors' Choice. Nominated for The Next Big Idea Club. The Week Magazine Book of the Week. From Alec Nevala-Lee, the author of the Hugo

and Locus Award finalist Astounding comes a revelatory biography of the visionary designer who defined the rules of startup culture and shaped America's idea of the future. During his lifetime, Buckminster Fuller was hailed as one of the greatest geniuses of the twentieth century. As the architectural designer and futurist best known for the geodesic dome, he enthralled a vast popular audience, inspired devotion from both the counterculture and the establishment, and was praised as a modern Leonardo da Vinci. To his admirers, he exemplified what one man could accomplish by approaching urgent design problems using a radically unconventional set of strategies which he based on a mystical conception of the universe's geometry. His views on sustainability, as embodied in the image of Spaceship Earth, convinced him that it was possible to provide for all humanity through the efficient use of planetary resources. From Epcot Center to the molecule named in his honor as the buckyball, Fuller's legacy endures to this day, and his belief in the transformative potential of technology profoundly influenced the founders of Silicon Valley. Inventor of the Future is the first authoritative biography to cover all aspects of Fuller's career. Drawing on meticulous research, dozens of interviews, and thousands of unpublished documents, Nevala Lee has produced a riveting portrait that transcends the myth of Fuller as an otherworldly generalist. It reconstructs the true origins of his most famous inventions, including the Dymaxion Car, the Wichita House, and the dome itself; his fraught relationships with his students and collaborators; his interactions with Frank Lloyd Wright, Isamu Noguchi, Clare Boothe Luce, John Cage, Steve Jobs, and many others; and his tumultuous private life in which his determination to succeed on his own terms came at an immense personal cost. In an era of accelerating change, Fuller's example remains enormously relevant, and his lessons for designers, activists, and innovators are as powerful and essential as ever.
