Spon's Architects' and Builders' Price Book 2022 AECOM,2021-09-23 A range of factors are all combining to propel input cost inflation Higher international logistics costs returning demand from industry workload and higher global metals prices are some of the ingredients to quicker building cost inflation Whilst some EU materials exporters to the UK are adjusting to Brexit other EU exporters initially smaller or specialist firms hit proportionally harder are now deciding not to supply the UK at all because the

additional red tape involved makes it not commercially viable. If this trend replicates across the whole EU to UK supply chain, visible disruption and higher prices are likely until other sources of supply begin to increase in volume and step in to address these supply issues. Among other exporters continuing to supply the UK, significant price increases are being applied to cover the permanent Brexit non-tariff barriers and additional administrative processes.

Spon's Architects' and Builders' Price Book 2023
AECOM, 2022-10-14

Construction cost inflation is at its highest level for decades. Global supply chains have been tested to the max as coronavirus and the war in Ukraine disrupted materials supply and raised energy costs at a time when UK trade policy was in the midst of significant change. It's been a perfect inflationary storm and prices of some materials have soared. AECOM's overall building cost index has reached record highs. Demand is currently holding up but project viability is coming under increasing pressure and headwinds are strengthening.

SPON'S ARCHITECTS AND BUILDERS PRICE BOOK 2023 compiled by AECOM still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index updated through the year 2015 100 gives an ongoing reality check and allows you to adjust for changing market conditions.
