Stalinist Architecture:

Architecture of the Stalin Era Alexei Tarkhanov, Sergei Kavtaradze, 1992 **Stalinist Architecture** Alexei Tarkhanov, Sergei Kavtaradze, 1992 This is a collection of contemporary paintings plans and drawings of Stalinist architecture The architectural competitions of the era were tools in the propagandistic mass culture which served as a form of control and this book uses these to chart developments and changes in architectural style **Morality and Architecture Revisited** David Watkin, 2001-08 When *Morality and Architecture* was first published in 1977 it received passionate praise and equally passionate criticism An editorial in *Apollo* entitled *The Time Bomb* claimed that it deserved to become a set book in art school and University art history departments and the *Times Literary Supplement* savaged it as an example of that kind of vindictiveness of which only Christians seem capable Here for the first time is the story of the book's impact In writing his groundbreaking polemic David Watkin had taken on the entire modernist establishment tracing it back to Pugin Viollet le Duc Corbusier and others who claimed that their chosen style had to be truthful and rational reflecting society's needs Any critic of this style was considered antisocial and immoral Only covertly did the giants of the architectural establishment support the author Watkin gives an overview of what has happened since the book's publication arguing that many of the old fallacies still persist This return to the attack is a revelation for anyone concerned architecture's past and future *Morality and Architecture Revisited* contains the entire text of the book *Morality and Architecture* plus additional material by David Watkin on the controversy that the book created *Stalin's Architect* Deyan Sudjic, 2022-06-14 The story of Boris Iofan designer of the iconic but unbuilt *Palace of the Soviets* whose buildings came to define the language of Soviet architecture What would an architect do for the chance to build the tallest building in the world What would he sacrifice to stay alive in the midst of Stalin's murderous purges This is the first major publication on the remarkable life and career of Boris Iofan 1891-1976 state architect to Joseph Stalin Iofan's story is an insight into the troubled relationship of all successful architects with power A gifted designer and a committed Communist Iofan became the Soviet Union's most celebrated architect after Alexei Rykov Lenin's successor persuaded him to return to Moscow from Rome with his aristocratic wife Olga Sasso Ruffo Iofan was at the heart of political life in the Soviet Union and his work is key to understanding its official culture When Stalin's henchmen crushed the architectural avant garde it was Iofan who created the new national style from the grand projects he realized including the *House on the Embankment* a megastructure of 505 homes for the Soviet elite to even more ambitious unbuilt projects in particular the *Palace of the Soviets* a baroque Stalinist dream whose image was reproduced throughout the Soviet Union His career took him to New York and Paris and to the destroyed city of Stalingrad He was a friend of Frank Lloyd Wright a rival of Le Corbusier Walter Gropius and Erich Mendelsohn and an enemy of Hitler's architect Albert Speer whose Nazi pavilion faced Iofan's Soviet one at the Paris Expo in 1937 He kept silent when Stalin executed his friends including Rykov he also sacrificed his own talent by following the dictator's instructions to the letter in creating the regime's

landmarks Generously illustrated with a wide range of previously unpublished material this book is an exploration of architecture as an instrument of statecraft It is an insight into the key moments of 20th century politics and culture from a unique perspective and the personal story of a remarkable individual who witnessed many of the most dramatic turning points of modern history *Architecture of the Stalin Era* Alexei Tarkhanov, Sergei Kavtaradze, 1992 **The Landscape of Stalinism** Evgeny Dobrenko, Eric Naiman, 2011-11-15 This wide ranging cultural history explores the expression of Bolshevik Party ideology through the lens of landscape or more broadly space Portrayed in visual images and words the landscape played a vital role in expressing and promoting ideology in the former Soviet Union during the Stalin years especially in the 1930s At the time the iconoclasm of the immediate postrevolutionary years had given way to nation building and a conscious attempt to create a new Soviet culture In painting architecture literature cinema and song images of landscape were enlisted to help mold the masses into joyful hardworking citizens of a state with a radiant utopian future all under the fatherly guidance of Joseph Stalin From backgrounds in history art history literary studies and philosophy the contributors show how Soviet space was sanctified coded and sold as an ideological product They explore the ways in which producers of various art forms used space to express what Katerina Clark calls a cartography of power an organization of the entire country into a hierarchy of spheres of relative sacredness with Moscow at the center The theme of center versus periphery figures prominently in many of the essays and the periphery is shown often to be paradoxically central Examining representations of space in objects as diverse as postage stamps a hikers magazine advertisements and the Soviet musical the authors show how cultural producers attempted to naturalize ideological space to make it an unquestioned part of the worldview Whether focusing on the new or the centuries old whether exploring a built cityscape a film documentary or the painting Stalin and Voroshilov in the Kremlin the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination Not all features of Soviet space were entirely novel and several of the essayists assert continuities with the prerevolutionary past One example is the importance of the mother image in mass songs of the Stalin period another is the boundless longing inspired in the Russian character by the burden of living amid vast empty spaces But whether focusing on the new or the centuries old whether exploring a built cityscape a film documentary or the painting Stalin and Voroshilov in the Kremlin the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination

Orleans and twentieth century Tokyo The theme of the volume is that the street presents itself as the basic structuring device of a city's form and also as the locus of its civilization Each essay is a detailed investigation of a single urban street with unique historical conditions The authors shared concern regarding anthropological political and technical aspects of street making coalesce into a critical discourse on urban space

Moscow Legends Benjamin Ramirez, AI, 2025-02-20 Moscow Legends explores the rich tapestry of Russia's capital revealing how its architecture and cultural heritage reflect centuries of political and social transformation The book journeys through Moscow's evolution highlighting the city's role as a symbol of Russian power and identity From the grandeur of the Kremlin to the imposing structures of the Soviet era Moscow's landscape tells a story of tsarist ambitions ideological shifts and the enduring traditions that have shaped its character Discover how Moscow resisted Peter the Great's reforms and the impact of events like the Napoleonic invasion and the Bolshevik Revolution on its identity The book uniquely examines Moscow as a palimpsest where each historical layer leaves an indelible mark on its buildings and monuments By drawing on historical chronicles architectural plans and personal accounts Moscow Legends provides fresh insights into the cultural and political forces that have shaped Moscow's urban history The book progresses from the city's early settlements to the present day examining key architectural periods and exploring Moscow's efforts to reclaim its heritage after the fall of the Soviet Union

Blueprints and Blood Hugh D. Hudson, Jr., 2015-03-08 Analyzing totalitarianism from below in a crucial area of Soviet culture Hugh Hudson shows how Stalinist forces within the architectural community destroyed an avant garde movement of urban planners and architects who attempted to create a more humane built environment for the Soviet people Through a study of the ideas and constructions of these visionary reformers Hudson explores their efforts to build new forms of housing and settlements designed to free the residents especially women from drudgery allowing them to participate in creative work and to enjoy the songs of larks Resolving to obliterate this movement of human liberation Stalinists in the field of architecture unleashed a little terror from below prior to Stalin's Great Terror Using formerly secret Party archives made available by perestroika Hudson finds in the rediscovered theoretical work of the avant garde architects a new understanding of their aims He shows for instance how they saw the necessity of bringing elite desires for a transformed world into harmony with the people's wish to preserve national culture Such goals brought their often divided movement into conflict with the Stalinists especially on the subject of collectivization Hudson's provocative work offers evidence that in spite of the ultimate success of the Stalinists the Bolshevik Revolution was not monolithic at one time it offered real architectural and human alternatives to the Terror Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books
