App and Website Accessibility Developments and Compliance Strategies Akgül, Yakup, 2021-08-13 In the present digital world the growing number of internet users has made web quality an important factor for accessing online services and increasing the customer base of an organization. The advances in information technology and the internet have opened new dimensions in many different industries. Currently, accessibility research is an active area of research. Specifically, access for everyone regardless of disability has become an essential aspect of web development. As webpages will be used by both nondisabled and disabled individuals, web pages must be designed with a technical criterion that fits universal needs. The ambition to make websites barrier free is not limited to standards and laws but has been on the agendas of all governments and public agencies recently, and this universality of websites is a fundamental area of research.

App and Website Accessibility Developments and Compliance Strategies intends to provide theoretical and practical contributions for the accessibility of websites for both disabled and nondisabled individuals. This book discusses how web quality parameters like usability and accessibility are being evaluated for their universal design and accessibility by different types of disabled individuals. The chapters cover the current methodologies for evaluation, accessible design criteria, inclusive practices in web and app development, and policies and interventions across different types of websites. This book is ideally intended for web developers, designers, software engineers, IT specialists, social organizations, governments, practitioners, researchers, academicians, and students in the usability and accessibility of websites for disabled individuals.
