the case under the traditional approach to construction The first part of this report looks at the role the construction manager has assumed in the management of safety on the construction site The second part of this report examines the legal and administrative safety environment the construction manager operates in The purpose of this review is to examine the validity of the assumption that a position of minimal involvement in the project safety effort is the best shield to the

with the construction industry as this is not tested in the online SAPI personality test Tertiary education in construction management and proper practical experience are crucial but without the necessary soft skills and purpose fit personality profile the construction manager would not be successful on a project
